- Item substitutions after order booking
- Procurement Intelligence

Manufacturing and Maintenance
- Buy/Sell Subcontracting
- Service Parts Planning
- LIFO & FIFO Costing
- Release Recommendations for Internal Requisitions
- Iterative Periodic Average Costing
- Manufacturing Execution System (MES)
- Asset Purchase & Maintenance
- Maintenance Forecasting & Budgeting
- Asset Move Workbench
- Generate next Preventive Maintenance

Sales and Service
- Service Contract Management
- Field Service Management
- Depot Repair

ACCELERATOR ASSETS

Leading Practice
- Business Flows
- Functionality Guide
- Industry Footprint

Education & User Acceptance
- Videos
- Flow Scripts
- Process Models
- Business Case Presentation

Project Team
- How-to Guides
- Online Configuration Tool

The Comprehensive Solution for Businesses of Any Size

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing today's complex equipment manufacturers. Complex equipment makers face shorter product lifecycles coupled with increasing design complexity. Manufacturers must place emphasis on delivering differentiated, complete systems with value-added services. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Flows Enabled

Sourcing Requirements to Agreement

- Establish vendor base, outsource non-proprietary components and track supplier performance
- Manage the entire procurement cycle from RFQ to final purchase agreements/contracts
- Complex coordination of global/regional outsourced manufacturers and service providers

Kanban Setup to Plan

- Enable lean, flexible manufacturing environments
- Leverage Flow Manufacturing to streamline the process for setting to managing a Kanban plan
- Conduct Kanban what-if analysis, adjust Kanban plan based on run time data

Schedule to Build - Discrete

- Adopt pull-based systems that speed information flow, eliminate waste, and reduce variability
- Issue work orders for manufacturing and issue material to work orders
- Execute and record operations activity, inspect goods
- Return components to stock and close work in process transactions
