Project Team

- How-to Guides
- Online Configuration Tool

The Comprehensive Solution for Businesses of Any Size

Oracle Business Accelerators deliver world-class functionalities that answer challenges faced by Commodity & Specialty Chemical manufacturers.

Chemicals manufacturing industries strive for growth through differentiation while combating downward pressures on margins. Excellence in developing and delivering products to meet unique customer requirements, increase in asset utilization to optimize chemical production lead to maximizing profitability and is the key to being an industry leader.

Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Flows Enabled

Schedule to Produce

- Identify, allocate and accurately dispense raw material lots to production batch
- Release and execute production batch, as per master batch record
- Enforce quality control on production batches
- Record actual material, resource usages, and deviations encountered, if any
- Update and maintain e-records against critical production batch events

Plan to Maintain Assets

- Execution of various types of maintenance work orders - planned, unplanned and emergency
- Effectively manage re-buildable spares, asset hierarchy and operational log and configuration history
- Fulfill work order capitalization and maintenance budget forecasting

Receipt to Estimated Landed Cost

- Insight into 'authentic' costs associated with acquiring raw materials including brokerage, terminal fee, insurance and transportation fees, etc.
- Ability to capture and configure additional charges incurred according to organization's needs
- Helps organization derive better pricing models of their products which help report more accurate profitability
