ORACLE BUSINESS ACCELERATOR FOR LIFE SCIENCES- PHARMACEUTICALS, BIOTECH

Oracle E-Business Suite Release 12.1.3

KEY FEATURES

QUICK FACTS

- 45 business flows
- 44 Oracle E-Business Suite products

NEW IN RELEASE 12.1

- Quality Management
- Product & Process Non Conformances with Corrective Actions
- Electronic Signatures
- Lot Genealogy & Traceability
- New Product Development
- Recipe Management
- Item Regulatory Information
- Product Stability Studies
- Product Cost Allocation
- Manufacture against Sales Order
- Report Manager
- Financials Intelligence
- Procurement Contract Management
- Sourcing Cost Factors
- Procurement Intelligence
- Change Management on Internal Sales Order
- Customer Order Credit Check (line level)
- Emergency Maintenance

ACCELERATOR ASSETS

Leading Practice

- Business Flows
- Functionality Guide
- Industry Footprint

Education & User Acceptance

- Videos
- Flow Scripts
- Process Models
- Business Case Presentation

Project Team

- How-to Guides
- Online Configuration Tool

The Comprehensive Solution for Businesses of Any Size

Oracle Business Accelerators deliver world-class functionalities that answer challenges faced by Life Sciences – Pharmaceuticals & Biotech manufacturers.

Pharmaceuticals & Biotech manufacturing industries face intense global competition and strive to innovate, manufacture and sell more effectively while managing compliance and minimizing risk. Managing business processes in a regulatory and GMP compliant environment has become even more important. Supporting capabilities to track, trace and authenticate drug is key to being an industry leader.

Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Flows Enabled

Quality Issue to Resolution

- Drive efficient product safety and compliance in accordance with section 21 part 11 and section 211.186 & 211.100 of US CFR
- Identify quality issue, trace product lots, its attributes from lot genealogy to track product and process non-conformances
- Perform corrective actions, report and maintain quality records

Stability Study Development to Evaluation

- Plan and setup stability study requirements using an approval process
- Launch and execute stability study tests as per protocol
- Evaluate test results with respect to product characteristics and test storage conditions
- Determine product shelf life and ideal storage conditions

Concept to Produce

- Execute trial pilot manufacturing batches with different process parameters
- Develop new formulations and product recipes derived from pilot batches
- Consider least cost formulation techniques to optimize best recipe before release for commercial use
- Compliance to e-signatures, item regulatory information and its traceability
