ORACLE BUSINESS ACCELERATOR INDUSTRIAL MANUFACTURING – PRODUCTS & COMPONENTS

KEY FEATURES

QUICK FACTS

- 45 Business flows
- 38 Oracle E-Business Suite products

ACCELERATOR ASSETS

Leading Practice

- Business Flows
- Functionality Guide
- Industry Footprint

Education & User Acceptance

- Videos
- Flow Scripts
- Process Models
- Business Case Presentation

Project Team

- How-to Guides
- Online Configuration Tool

Oracle E-Business Suite Release 12.1.3

The Comprehensive Solution for Businesses of Any Size

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing today's Industrial Products & Components manufacturing companies. Manufacturers must reduce costs and streamline operations to respond more rapidly and accurately to demand changes. They need to achieve shop floor excellence with performance-driven manufacturing and improve shop floor productivity and product quality. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time

Sample Key Business Flows Enabled

Consignment to Consumption (VMI)

- Sell-side Vendor Managed Inventory (VMI)
- Stock and manage consigned material at customer sites based on mutually agreed stock maintenance levels
- Automatic generation of accounts receivable invoices based on actual consumption of consigned inventory at customer locations

Kanban Setup to Plan

- Enable lean, flexible manufacturing environments
- Leverage Flow Manufacturing to streamline the process for setting to managing a Kanban plan
- Conduct Kanban what-if analysis, adjust Kanban plan based on run time data

Schedule to Build - Discrete

- Adopt pull-based systems that speed information flow, eliminate waste, and reduce variability
- Issue work orders for manufacturing and issue material to work orders
- Execute and record operations activity, inspect goods
- Return components to stock and close work
