

White Papers—In Depth Information About Benefits of Oracle Fusion and Its Architecture

Whether you're an existing customer or looking to upgrade, an IT manager or an executive, own PeopleSoft applications or the Oracle E-Business suite you need details on Oracle Fusion. The following white papers should help you understand Oracle's next-generation enterprise software, regardless of job role or state of your systems.

Oracle Fusion Applications Design and Architecture

Unifying the enterprise means giving your entire business ecosystem—employees, partners, suppliers, customers—access to the knowledge they need to respond to market conditions with speed and agility, all while managing cost and risk. This paper outlines the technology choices Oracle made in developing Oracle Fusion Applications and the rationale behind these decisions.

Oracle Fusion Applications: How Oracle Enables Adaptive Business Processes

Oracle Fusion Applications is being designed to make business processes adaptable so that your organization can respond quickly to changing requirements. This paper explains how Oracle enables adaptability through service-oriented architecture.

Oracle Fusion Applications: Delivering Greater Business Insight

Oracle's dialog with customers has revealed that a majority of business decision makers today can't access high-quality, reliable, timely, and useful information. This paper offers a blueprint for building truly information-driven applications that provide that information when and where it's needed.

Oracle Fusion Applications: A Superior Ownership Experience

Oracle's Superior Ownership Experience (SOE) encompasses a wide range of benefits that minimize the cost and risk inherent in the lifecycle of enterprise applications. This paper describes how SOE is a design goal for the Oracle Fusion platform, and a path for the continual evolution of Oracle Applications.

Oracle Fusion Applications: Business Energy for the Future

How do you unify your enterprise and preserve your existing software investment? This paper discusses how Oracle Fusion Applications achieve that goal in the areas of financial management, corporate performance management, supply chain management, human capital management, and customer relationship management.

Exploring Upgrade Strategies to Oracle Fusion Applications

As part of Oracle's Superior Ownership Experience initiative, the upgrade process is essential to ensure a solution that will encompass all critical customer needs. In this paper, some upgrade strategies and initiatives are discussed, including Oracle's Fusion Upgrade Customer Council.

Oracle E-Business Suite 11i.10 Upgrade Strategies

Oracle E-Business Suite is developed based on extensive feedback from customers. This paper shows how the customer-demanded abilities to maximize IT investments, achieve benefits rapidly, and gain greater business insight have been built into the applications, and how they'll be preserved in the evolution to Fusion.

Oracle's PeopleSoft Enterprise 8.9 Upgrade Strategies

A well-planned upgrade can substantially reduce the time, cost, and complexity of implementing the latest features of the PeopleSoft Enterprise product line. This document addresses your upgrade options and shows you a range of typical upgrade paths based on your current release of Enterprise software.

Oracle's JD Edwards World Upgrade Strategies

Oracle's JD Edwards World offers small and midsize businesses a reliable, functionality-rich, Web-enabled ERP environment. This paper offers detail on Oracle's strategy for protecting, extending, and evolving the JD Edwards World customer's software investments.

Oracle's JD Edwards EnterpriseOne Upgrade Strategies

Upgrading not only gives you access to new functionality, it also ensures that you are working on the latest technology platforms and have the support you need. This paper guides you through the upgrade path, with special focus on new functionality, support policies, release dates, and information on how to move toward Oracle Fusion.

Extending PeopleSoft Applications with Oracle Fusion Middleware

Service-oriented architecture (SOA) is a fundamental shift in the way custom applications are designed, developed, and integrated with legacy business applications. This paper outlines how Oracle Fusion Middleware complements PeopleSoft Enterprise by applying SOA to achieve greater business and IT flexibility and speed.

Roadmap to Fusion: Engaging Oracle Consulting on the Path to Your Next-Generation Business Platform

Fusion requires that you protect your existing investments, extend the value of your current implementation, and evolve your business by taking advantage of the new capabilities available in Oracle's next-generation products. Oracle Consulting has the expertise to guide you through this process and ensure that you have a clear and achievable roadmap to Fusion, your next business platform.
