

JD EDWARDS ENTERPRISEONE LOCALIZATION – CZECH REPUBLIC

KEY FEATURES

- Adhere to local laws and regulations of the Czech Republic
- Fully integrated with all transactions
- Addresses local requirements to make the system useful in the country
- Comprehensive, pre-built reporting capabilities specific for the Czech Republic
- European Union specific reports
- Built on the same toolset as other JD Edwards EnterpriseOne modules which lowers system ownership costs
- Same look and feel as the rest of the JD Edwards EnterpriseOne solution which reduces training and increases employee flexibility
- Flexible and data driven solutions to address new regulations and rules without waiting for software updates

JD Edwards EnterpriseOne is an ERP solution that manages multiple business processes of your company. To enhance these business processes and to ensure regulatory compliance, ERP systems needs to address local requirements for a specific country. The process of adapting the software to the local requirement is called Localization.

Localization for tax processing and reports, currency management, general ledger, country specific financial reports and others are provided to customers in the Czech Republic using the JD Edwards EnterpriseOne Localization for Czech Republic solution.

The Issue: Why Do Companies Care About Localization?

Business organizations working within the Czech Republic are required to comply with country specific regulations and business common practices to handle daily business transactions and operations to meet their legal obligations for in-country activities. Non-adherence to these rules and regulations can lead to severe consequences for a company.

The Solution: Localization of ERP Business Software for the Czech Republic

With Oracle's JD Edwards EnterpriseOne Localization for Czech Republic solution you combine the power of proven, global ERP business software with country specific and integrated adaptations that address local needs to run your enterprise in the Czech Republic. This localization package provides several out of the box solutions so that implementation of the software is faster and more efficient. The table on the next page provides a sample of functionality included with in JD Edwards EnterpriseOne Localization for the Czech Republic

JD Edwards EnterpriseOne Localization for the Czech Republic is a core module that is included with the software and delivered to all customers in the Czech Republic who license version 8.11 SP1 or later.

Fully Integrated with JD Edwards EnterpriseOne Base Software

The JD Edwards EnterpriseOne Localization for the Czech Republic is fully integrated with JD Edwards EnterpriseOne base software. This means Oracle ensures that all localizations coexist with each other, allowing operation in multiple countries on a unified technology platform or instance.

Common Technology + Same Look and Feel = Lower Total Ownership Cost

JD Edwards EnterpriseOne Localization for the Czech Republic is built using the same toolset as the rest of the solution. This provides a common look and feel of the deployed solution that matches every JD Edwards EnterpriseOne module used by your company

which in turn reduces deployment, support and training costs while increasing user productivity and team flexibility. The bottom line is that your bottom line benefits from a lower total cost of ownership for your complete ERP system.

Flexible and Extensible for New/Change Government Rules and Regulations

This localization development strategy is to produce a flexible product that allows companies to address future government enhancements. For example, it allows you to easily change tax rates and percentages. It even lets you add additional tax types if the government of the Czech Republic introduces new taxes in the future.
