*As organizations grow in size and complexity, their existing systems must make it possible to conduct business in the marketplace and to support internal operations in a secure manner. Oracle's seamless, defense-in-depth approach, providing a single infrastructure for managing all aspects of security with an enterprise, enables organizations to manage ERP and business applications securely, effectively, and efficiently.*

## About Oracle Application Security

Oracle Application Security applies to all Oracle technologies in the application space:

- **Oracle E-Business Suite.** Oracle Applications technology provides customers with several information-driven advantages, including unparalleled embedded analytic access, by means of Daily Business Intelligence (DBI), to a comprehensive business view of your enterprise across all geographic regions.
- **Oracle PeopleSoft Enterprise.** PeopleSoft tools and technology transform the way organizations implement, use, and maintain enterprise software. We offer an automated, highly flexible development environment; integration and business modeling tools; world-class usability; and predictive, customer system-specific diagnostic and support tools.
- **Oracle JD Edwards EnterpriseOne.** JD Edwards EnterpriseOne Tools offer you a complete technology solution for running JD Edwards EnterpriseOne applications. Built around the concepts of flexibility and adaptability, JD Edwards EnterpriseOne Tools enable your business to adjust to changing business conditions.
- **Oracle Siebel.** Siebel Customer Relationship Management (CRM) solutions, designed to fit any size organization, empower companies to deliver seamless and superior customer experiences by extending CRM to everyone in their organizations and partner networks.

Complementary to Oracle's suite of Applications, Oracle Fusion Middleware offers a comprehensive solution for developing, integrating, and deploying your enterprise's applications, portals, and Web services, providing complete business integration and business intelligence suites and best-of-breed portal software. As the only platform designed for grid computing as well as full lifecycle support for Service-Oriented Architecture (SOA), Oracle Fusion Middleware gives your company unmatched scalability, availability, manageability, and security.

## Key Benefits

The primary benefits of application security lie in reducing the cost and risks associated with utilizing ERP and business applications within an organization. The security of

## ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

transaction-based business processes is essential to meeting regulatory compliance and driving sustainable business activities. Also, any organization that is planning or deploying an Oracle Applications based solution or has recently merged with or acquired another organization with Oracle Applications, faces significant security challenges when bringing core business technologies together.

### How We Do It

Oracle Consulting brings the power of Oracle's leading security and identity management technologies to customers through the Oracle Unified Method, a proven approach to maximizing business value while minimizing risk, time and cost associated with the implementation of performance management solutions. In addition, we leverage a variety of partners with niche vertical and horizontal expertise to ensure the most capable and appropriate provider is available to support your business objectives. Oracle consultants have access to the wide range of resources within Oracle, including best practices developed in our work with other customers and the knowledge of the engineering team that works to develop Oracle's Advanced and Predictive Analytics products.

### How We Are Different

The Oracle Consulting team is focused exclusively on Oracle technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

### Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
