

ORACLE BUSINESS INTELLIGENCE RAPID START FOR PEOPLESOFT ENTERPRISE

AT A GLANCE

Oracle Business Intelligence Applications for PeopleSoft Enterprise provide unmatched insight that supports major operational business functions across the organization – such as finance and human resources, and can be tailored to meet the unique information requirements of a wide range of industries.

By leveraging the Oracle Business Analytics Warehouse (BAW) and the robust dashboarding and ad hoc reporting capabilities of Oracle's market-leading business intelligence platform, Oracle Business Intelligence Enterprise Edition, you benefit from a complete end-to-end integrated business intelligence and reporting solution.

Key benefits of Oracle Business Intelligence Applications Rapid Start solutions for PeopleSoft Enterprise include:

- Predictable implementation cost and timeframe
- Fast return-on-investment across the organization
- Reduced implementation complexity
- Knowledge transfer around analytics best practices
- Reduced risk through the use of Oracle Certified Analytics Consultants

Businesses are undergoing a fundamental shift in the way they make decisions. In today's rapidly changing environment, decision-making occurs more frequently and at all levels of an organization. Having access to your company's crucial information and using that business intelligence to achieve strategic enterprise-wide objectives differentiates highly successful businesses from potential competitors.

About Oracle Business Intelligence Applications Rapid Start Solutions

Oracle Business Intelligence Applications Rapid Start for PeopleSoft Enterprise compiles services into deliverable-based offerings that draw on Oracle's experiences with more than 600 successful customer implementations. By leveraging a proven implementation approach, the Oracle Rapid Start enables organizations to quickly launch a successful deployment of the Oracle Business Intelligence suite.

Key Benefits

The Oracle Business Intelligence Applications Rapid Start for PeopleSoft Enterprise lays the groundwork for continued business intelligence application development and deployment across the enterprise by providing:

- A solid foundation for future development by following leading business intelligence best practices
- Predictable implementation cost and timeframe to help you plan for and stay on budget
- Faster return-on-investment through on-time project delivery, reduced total cost of ownership, and minimized risk
- Reduced implementation complexity by leveraging experienced consultants; well-defined scope; a proven methodology; and product expertise

How We Do It

Oracle Business Intelligence Applications Rapid Start solutions for PeopleSoft Enterprise have been designed to address three levels of customer needs:

Pilot Offering (A): This offering has been designed to assist customers with the development of a functional pilot that can be used to gather support within the organization and/or facilitate end user education and requirements definition.

Intermediate Offering (B): The intermediate offering assists your organization with a production deployment based on well-defined, limited-scope business requirements. Concluding with a best practices workshop and a planning session, this offering provides a solid entry point for expanded deployment.

Extended Offering (C): The extended implementation supports the launch of an ongoing business intelligence program and can be considered a full Phase I deployment, covering all project tasks required from development through production. The extended offering provides the best foundation for building enterprise-wide business intelligence solutions.

Each Oracle Rapid Start is built upon proven cost estimates based on numerous implementations and our tools-based methodology. An Oracle Business Intelligence Solution Architect will validate the scope of each offering against your defined requirements to confirm complete alignment. The following table details the scope covered by each:

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success
