ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

Developing an enterprise security architecture allows organizations to identify the business, IT and compliance elements that must be secured to achieve key objectives and goals, and provides key stakeholders with the ability to plan and prioritize strategic IT security investments pertinent to technology implementations, process enhancements and user awareness initiatives.

About Oracle Enterprise Security and Compliance Services

Oracle's Enterprise Security architects are available to review your organization's current enterprise security situation and design an improved security infrastructure that meets current and planned objectives. This process involves:

- Review of established policies, procedures, and standards
- Evaluation of compliance with governmental and industry regulations
- Information security best practices
- Security management and operations
- Review of your company's technical infrastructure
- Current state analysis of your Oracle technology and application security
- Identity management
- Privacy and compliance management

By means of Oracle's Security and Privacy Compliance Framework, Oracle's architects can help you discover, define and design a corporate security and compliance strategy and roadmap.

Key Benefits

Oracle's Enterprise Security and Compliance Services can reduce the cost and risks associated with managing the people, process and technology components of organizations. They are of particular benefit to organizations with segregated compliance, security, architecture and IT groups that encounter difficulty in planning IT security solutions to meet the organization's strategic business goals and objectives.

Any organization that has recently purchased new Oracle technologies without a defined execution plan can benefit greatly from assessing their enterprise security and compliance requirements. We can help you to define an architecture and roadmap necessary for supporting a business case to fund future strategic and tactical deployment initiatives and providing:

- Clear understanding of Oracle technologies aligned with organizational direction, strategies and objectives
- Roadmap and strategy components necessary to support strategic objectives of the organization's business and IT operating units
- Ability to plan cost-effective, strategic technology projects
- Comprehensive alignment of regulatory compliance requirements to IT security policy and technology solutions for mitigating controls

How We Do It

Oracle Consulting brings the power of Oracle's leading security and identity management technologies to customers through the Oracle Unified Method, a proven approach to maximizing business value while minimizing risk, time and cost associated with the implementation of performance management solutions. In addition, we leverage a number of partners with niche vertical and horizontal expertise to ensure the most capable and appropriate provider is available to support your business objectives. Oracle consultants have access to the wide range of resources within Oracle, including best practices developed in our work with other customers and the knowledge of the engineering team that works to develop Oracle's Advanced and Predictive Analytics products.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
