

ORACLE ENTERPRISE SECURITY STRATEGY FOR PEOPLESOFT APPLICATIONS

Oracle Expert Services

AT A GLANCE

- Development of a forward strategy and action plan
- Identification of opportunities to reduce long-term security costs
- Gap Analysis of current PeopleSoft solution
- Enhancement of service levels

Oracle Consulting's Enterprise Security Strategy service delivers an overall strategy to support application security within an organization. This workshop provides an overview of the security features available within PeopleSoft applications, while specifically highlighting the technologies embedded in those applications and how they integrate with the organization's overall security infrastructure. This workshop should be the starting point for determining security requirements and how to map those requirements into an overall enterprise security solution.

Overview

The Oracle Enterprise Security Strategy workshop is a two-week discovery and analysis engagement. During the engagement, Oracle product experts will assist you in establishing an acceptable and proven framework to determine that your PeopleSoft application security implementation is aligned with your business objectives and corporate security policies. Our team of highly skilled, veteran implementation experts can assist in designing and integrating PeopleSoft security into your enterprise security infrastructure, while delivering a level of confidence and quality that only Oracle, the product's developer, can provide.

The engagement will consist of various discovery workshops and interactive questionnaire reviews with your organization's teams focused on business and technical requirements. The resulting deliverables will provide your organization key recommendations necessary for the optimal use of PeopleSoft application security design, PeopleSoft Security Integration tools, compliance, and suggestions for future implementation project considerations.

Our experts will identify potential issues and offer practical suggestions for how your organization can maximize its investment in PeopleSoft solutions by improving overall administration, maintenance and security compliance, thereby streamlining operational processes and ultimately providing your organization with a security framework that is flexible and scalable to meet future demands.

Scope of the Offering

The Oracle Enterprise Security Strategy workshop addresses the following areas:

- Determination of the appropriate application security design, configuration and security components necessary to optimize the overall PeopleSoft solution
- Alignment of business, system, compliance and privacy requirements with

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

corporate security policies

- Provides a proper understanding of how to efficiently design roles, permission lists, and user configurations to optimize the PeopleSoft solution
- Provides separation of duties guidance on specific responsibilities required for security administrators and applications owners
- A strategic and tactical action plan to continue with implementation
- A plan to reduce long-term security administration costs and burdens, while enhancing required service levels

Requirements

- The client will perform all pre-inception tasks prior to the arrival of the engagement team.
- Access to all necessary systems will be available to the engagement team for the full duration of the engagement.

Major Deliverables

- **Application Security Strategy Brief:** Documentation of your overall application strategy with recommended best practices and next steps.
- **Infrastructure Security Strategy Brief:** Documentation of your overall infrastructure strategy with recommended best practices and next steps.
- **High-Level Security Project Timeline:** Documentation of the time and level of effort required for future application and infrastructure security projects.
- **Executive Overview Presentation:** The Oracle consultant presents findings in person to a limited audience (determined prior to the engagement) at your facility.
