- Oracle Identity and Access Management Suite

Oracle Identity Management allows enterprises to manage end-to-end lifecycle of user identities across all enterprise resources both within and beyond the firewall. You can deploy applications faster, apply the most granular protection to enterprise resources, automatically eliminate latent access privileges, and much more.

About Oracle Identity Management

Oracle Identity Management technologies focus on automating and securing the management of user identities throughout the application and user lifecycles. There are five main business drivers acting as catalysts in the adoption of identity management solutions by customers:

- **Mitigating security risks.** Negative publicity about security incidents can shake customer and investor confidence in a company. Many of the recent events in the news involve unauthorized access to applications or data, often by outsiders, ex-employees or employees with illegal access.
- **End user expectations.** As companies deploy enterprise portals for aggregating applications, users expect transparent application access.
- **Regulatory compliance.** Organizations need to satisfy strict privacy and compliance requirements to properly operate in their specific industry and comply with government regulations. Meeting these requirements imposes a challenge on the way companies administer and enforce security both internally and externally.
- **Adaptability and business agility.** In every industry, innovative companies are looking for new ways to exploit the ubiquitous connectivity offered by the Internet with new ways of linking up partners, suppliers, customers and virtual teams.
- **Cost containment.** Finally, IT shops everywhere are being asked to “do more with less,” whether it is supporting new application deployments, new user populations (such as customers and partners), or new business interaction models.

Key Benefits

Organizations increasingly face pressures such as expanding threat profiles, the need to provide higher levels of service, increased regulation, complex global operations, mergers and acquisitions, and business model innovation. Oracle Identity Management helps companies manage their environments more efficiently through functional capabilities such as centralized user management, administrative delegation, directory services and automated provisioning. The Oracle Identity Management Suite helps

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption

- Bridging islands of user identity information across varied infrastructures.

How We Do It

Oracle Consulting brings the power of Oracle's leading security and identity management technologies to customers through the Oracle Unified Method, a proven approach to maximizing business value while minimizing risk, time and cost associated with the implementation of performance management solutions. In addition, we leverage a variety of partners with niche vertical and horizontal expertise to ensure the most capable and appropriate provider is available to support your business objectives. Oracle consultants have access to the wide range of resources within Oracle, including best practices developed in our work with other customers and the knowledge of the engineering team that works to develop Oracle's Advanced and Predictive Analytics products.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success. To learn more, contact your local Oracle Consulting representative at 1-800-633-0615, email ask-oracleconsulting_us@oracle.com, or visit www.oracle.com/consulting.
