- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

*Providing an overall strategy for a secure, scalable, reliable, and flexible identity management infrastructure, Oracle's Identity Management Deployment Strategy, a workshop series, assists with overall identity management business requirements and deployment challenges that your organization faces. In addition to best practices, this service provides a deployment strategy based on your organization's identity management deployment requirements.*

### Overview

The Oracle Identity Management Deployment Strategy service is a 5-10 day workshop series consisting of discovery, design, and a very high-level architecture development and security analysis of the identity management infrastructure to be deployed. A presentation of findings and recommendations based on best practices brings your overall identity management infrastructure to a solid roadmap. Oracle product experts will review your organization's existing identity management implementation and architecture deployment requirements and identify and report any security, scalability challenges, risks, and concerns to you.

This service identifies how to deploy identity management while leveraging existing investment in identity management infrastructure components. Oracle Consulting methodologies combine in-depth analytical techniques to help you better understand how to deploy identity management components while reducing your associated risks and costs. We deliver a level of confidence and quality only Oracle, the product's maker, can provide.

### Scope of the Offering

The Oracle Identity Management Deployment Strategy workshop is designed to help your organization evaluate identity management infrastructure deployment requirements.

This service provides your organization with the following:

- Detailed analysis and business impact of existing identity management investments from Oracle
- Reduction of the risk and business costs of security breaches in the event of identity theft
- Review of anticipated identity data usage, storage, and access
- Increased identity management awareness and information on the overall effectiveness of securing identity data

- Technology-based strategy solutions for deploying a scalable, secure, and reliable identity management infrastructure
- Increased awareness of your identity management deployment strategy, including administration of identity management components, security, audit controls, and regulatory compliance of identity data

Oracle Consulting will provide your organization with the means and knowledge to better deploy and manage the identity data in your systems.

### Requirements

- The client will perform all pre-inception tasks prior to the arrival of the engagement team. Oracle will provide the task list prior to arrival onsite.
- Access to all necessary systems will be available to the engagement team for the full duration of the engagement.

### Major Deliverables

- Discovery Guide: This guide documents the discovery of your existing identity management deployment strategy, including architecture and current practices.
- Deployment Strategy Guide: This document provides the new overall identity management deployment strategy, including specific recommendations for current issues and challenges encompassing resolutions, next steps, and best practices.
- Security Guide: This guide summarizes all identity data architecture and security requirements based on discovery, strategy, and best practices.
- Presentation: The Oracle security consultant will present findings in person to a limited audience (determined prior to the engagement) at your facility.

### Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
