Are you interested in driving additional business value from your JD Edwards Applications in terms of cross-functional enterprise level business intelligence? One of the common pain points in any organization is the state of its data—reporting and analytics are not readily available or as accessible as they should be. To help your organization develop a reporting solution that satisfies these requirements across the enterprise, Oracle Consulting has developed the JD Edwards Data Warehousing Strategy Workshop—a service dedicated to the analytics and reporting needs of your organization.

Overview

The JD Edwards Data Warehousing Strategy Workshop is a 2-day program where Oracle experts collaborate with key individuals and groups responsible for your enterprise warehouse strategy. We'll work with you to understand how the JD Edwards Data Warehousing offering can address your business drivers and support the reporting needs of your organization.

The JD Edwards Data Warehousing Strategy Workshop is designed to help you map out your enterprise warehouse strategy. Like all Oracle Services, this workshop will help you stay on course, and drive more immediate value from your Oracle investment.

Oracle experts follow structured methodologies, utilizing proprietary fact-finding tools, while applying their technological and functional expertise. The JD Edwards Data Warehousing Strategy Workshop helps you:

- **Meet your business objectives:** Discover how to best utilize an enterprise warehousing solution to meet your business objectives.
- **Develop a customized strategy:** Generate a strategy brief to address your enterprise warehouse implementation efforts.
- **Enhance processes:** Improve your business analytics and reporting by understanding the optimal implementation approach for your organization.
- **Mitigate risk:** To help keep your project on track - identify and plan for possible project risks.
- **Organize the project:** Build the project framework, defining project roles and responsibilities, project administration, and issue resolution processes.

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

Scope of the Offering

During the JD Edwards Data Warehouse Strategy Workshop, Oracle experts will meet with various groups within your organization to conduct discovery sessions that enable us to determine your analytic and reporting needs. You and your team will cover the following topics:

- **Identify goals and objectives:** Synthesize your objectives to develop a project mission statement.
- **Identify data warehousing business drivers:** Determine the business drivers affecting your data warehouse needs.
- **Assess enterprise warehouse infrastructure needs:** Review your operating systems, hardware servers, and configuration management plans to help you prepare for your implementation.
- **Review analytics, reporting, and data warehouse requirements:** Review your current systems, processes, and security parameters, to determine project scope.
- **Address system performance expectations:** Understand the impact of implementing the enterprise warehouse solution.

At the end of the workshop, you will have a strategy brief, a formal write-up of the workshop findings, and our recommendations for data warehousing / business intelligence solutions including a phase-one, high-level plan.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
