

PEOPLESOFT ENTERPRISE ARCHITECTURE ASSESSMENT

Oracle Expert Services

AT A GLANCE

- Identify suitable architecture for PeopleSoft Enterprise
- Identify potential roadblocks and define best approach to remove them
- Answers to Implementation questions
- Opportunity to review architecture with PeopleSoft Enterprise experts
- Provide recommendations
- Detailed assessment report

In order to meet business needs, the technical infrastructure must be planned and implemented in conjunction with Oracle's PeopleSoft Enterprise applications. Oracle Consulting's PeopleSoft Enterprise Architecture Assessment will help you find the answers to your technical implementation questions on implementing PeopleSoft Enterprise 8.

PeopleSoft Enterprise Architecture Assessment Overview

Oracle consultants follow a structured methodology, utilizing a proprietary fact-finding tool and applying deep technological expertise. Our consultants will help you define the technical architecture support requirements to achieve your business objectives.

Oracle's PeopleSoft Enterprise Architecture Assessment provides an opportunity to counsel your IT team on technical issues on PeopleSoft Enterprise 8 before they become implementation roadblocks. By proactively dealing with technology issues, these issues will stay off the implementation's critical path.

Early Evaluation Means Lasting Success

The PeopleSoft Enterprise Architecture Assessment provides the best Oracle technical expertise available. Our consultants will:

- Guide you to the optimal technology decisions. Our technical consulting team has unparalleled insights into the experiences of PeopleSoft Enterprise customers and access to the best Oracle internal resources, all of which come together to provide a clear technology vision.
- Bridge the gap between business process requirements and enabling technologies. Recognize the interdependencies and plan technology in the context of business goals, both specific to PeopleSoft Enterprise 8 and overall.
- Address key technical issues proactively. These issues include architectural design, performance planning, network planning, reporting, security, Web enablement and many others.
- Mitigate technical risks by identifying potential issues, associated tradeoffs and decisions to be made.
- Identify resource needs. The results of the assessment will help in the technical project management. Focused consulting expertise can be brought to bear on specific implementation areas, such as technical project management, architectural planning, system administration, performance planning, tuning, database administration, and more.

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

Scope and Approach

The PeopleSoft Enterprise Architecture Assessment is typically a one to two week service, depending upon infrastructure size and implementation scope, which is delivered early in the implementation or before an upgrade—before the technical infrastructure is in place. It can help uncover obstacles and issues before they arise, thereby helping to keep you on schedule. During this assessment you will:

- Learn your key business issues and identify processes that will drive the implementation or upgrade
- Learn the PeopleSoft Enterprise architecture and discuss deployment strategies
- Understand your existing technical infrastructure and review the planned technical architecture
- Identify system architecture by bridging the gap between business process requirements and enabling technologies
- Understand your personnel skill set and identify gaps to fill resource needs in the technical project management, architectural planning, system administration, performance planning, tuning, and database administration

Major Deliverables

- **Architecture Assessment report:** A formal write-up of the assessment's findings, as well as recommendations
- **Half-day architectural overview:** This session will provide an opportunity for everyone to become accurately grounded in the PeopleSoft Enterprise architecture.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
