RELATED SERVICES:

The following services are also available:

- Oracle Content Management Implementation Advisor
- Oracle Content Management Implementation Roadmap

Oracle Content Management is a portfolio of industry-leading solutions that delivers a new level of integration and productivity across the entire spectrum of unstructured content. Oracle's System Architecture Review and Design helps you maximize the productivity of your Oracle Content Management solution by developing the appropriate architecture for your implementation.

Overview

With this packaged service offering, Oracle's top technical architects will develop an architecture that meets your specific business and technical requirements. The architecture design will address your hardware architecture, capacity, scalability, reliability, security, backup and high availability plans. It will also verify that you are utilizing the most appropriate Oracle products for your project goals.

Oracle's System Architecture Review and Design is an ideal offering for new enterprise or global customers who have complex requirements and infrastructure. It is also helpful for existing customers who are experiencing technical issues with their current system or are planning new Oracle initiatives.

Customer Benefits

- Ability to leverage Oracle's deep product expertise and best practices
- Develop a scalable architecture to meet your business and technical requirements
- Reduce deployment time
- Mitigate implementation risk
- Understand how you can most effectively utilize your Oracle solution

Key Activities

- Assess your current enterprise architecture
- Discuss your planned content management business and technical plans and requirements
- Design a target logical and physical architecture
- Develop the system architecture assessment and design document
- Review our findings and recommendations with you

Typical Deliverables

- Oracle technical architecture overview presentation

- System architecture review and design document that includes:
 - Number of environments
 - Hardware sizing
 - Network infrastructure diagram
 - Required Oracle software component placement within the environment

Average Length of Time

We can complete our System Architecture Review and Design service in approximately one to two weeks. Factors such as physical location of IT resources and complexity of environment and requirements can influence the actual length of the project.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
