Solutions Offerings

- Oracle Database
- Oracle Fusion Middleware
- Oracle Applications
- Oracle Services

From its inception to the present, Oracle has focused on innovation and results, and how they can benefit companies such as yours. Oracle customers are using Oracle technology, applications, and services to help them

- Securely store and share information
- Maintain existing platforms and investments
- Upgrade on their own timetable
- Tie their solutions together with an open architecture
- Cut labor costs and reduce security risks
- Extend and modify business processes
- Facilitate compliance with regulations
- Integrate service and support
- Efficiently manage licensing and portfolios
- Manage complex upgrades with fewer risks

If these challenges are also your challenges, your enterprise is ready to build a complete, integrated, and open information system.

Thousands of customers from every industry around the world use Oracle products to transform their businesses and achieve greater success.

Oracle Database

Oracle Database, the first relational database designed for grid computing, helps ensure that enterprise information is always available and secure. Oracle is the most reliable choice for large enterprises, midsize businesses, and departments alike. Oracle provides the

- No. 1 database
- No. 1 data warehousing
- No. 1 database on Linux
- No. 1 embedded database

Oracle Fusion Middleware

Oracle Fusion Middleware consolidates Oracle's leading, standards-based software to deliver "hot-pluggable" middleware with a comprehensive and seamlessly integrated service-oriented architecture software infrastructure.

Fact: Oracle is the largest enterprise software company in the world, with more than 320,000 customers—including 98 of the Fortune 100—and supports these customers in more than 145 countries.

Oracle is the

- No. 1 in business intelligence
- Industry leader in identity management, with comprehensive, award-winning offerings
- No. 1 in application platform suites
- No. 1 in enterprise performance management

Oracle Applications

Oracle Applications—including Oracle E-Business Suite, PeopleSoft Enterprise, JD Edwards EnterpriseOne, JD Edwards World, Siebel, and Hyperion—help deliver the complete functionality and business intelligence that companies need to compete and win. In fact, Oracle has the No. 1 customer relationship management and human capital management applications, and benefits customers by enabling customer success, providing a complete offering, and presenting the strongest strategic road map.

Oracle Industry Solutions

Oracle industry solutions address the specific challenges and processes unique to your industry. Many of the world's top retail, manufacturing, life sciences, communications, utilities, and financial services firms are among the many businesses that are poised to profit from Oracle's industry focus. Globally, Oracle is a leader in financial services, the public sector, professional services, retail, and communications.

Oracle customers include

- 20 of the top 20 communication service providers
- 20 of the top 20 retailers
- 20 of the top 20 insurance companies
- 20 of the top 20 pharmaceutical companies
- 20 of the top 20 banks
- 20 of the top 20 automotive manufacturers
- 10 of the top 10 automotive suppliers

Oracle Services

Oracle services help companies get the most from their technology investments and span the full solution lifecycle.

- **Oracle On Demand** delivers the world's leading software to end users and manages IT infrastructure, software, security, service levels, and IT governance—allowing you to focus on your core business
- **Oracle University** delivers flexible, quality instruction with a commitment to customer satisfaction—offering more than 500 courses that cover virtually all of Oracle's products
- **Oracle Consulting** assembles, optimizes, and manages the software that puts your business data to work
- **Oracle Support** offers comprehensive maintenance and problem resolution for Oracle technology and application products, so you get the level of support that suits your business

Oracle Technology Leadership

Oracle has been a leader in the software industry for more than 30 years and has developed many firsts. In areas ranging from the relational database, to Linux and grid computing technology in the enterprise, to service-oriented architecture, Web services, XML, and virtualization through Oracle VM, Oracle continues its technology leadership today. In fiscal year 2008, Oracle spent US\$2.7 billion in research and development costs—12 percent of total revenue.

Dedicated to Your Success

Oracle's commitment to providing industry expertise and world-class products to its customers could not be stronger. Customers, partners, and analysts recognize the comprehensiveness and strength of Oracle products and services, all developed with the input of thousands of valued customers through customer advisory boards and Oracle user groups. Oracle is able to deliver it all. Every step of the way, Oracle's commitment to innovation is driven by its commitment to customer success.
