ORACLE REPORTS Q4 GAAP EPS OF 20 CENTS, NON-GAAP EPS OF 26 CENTS UP 36%

Applications New License Sales up 52%; Database and Middleware New License Sales up 16%

REDWOOD SHORES, Calif., June 29, 2005 -- Oracle Corporation (NASDAQ: ORCL) today announced that fiscal 2005 Q4 GAAP earnings per share were up 4% to \$0.20, and non-GAAP earnings per share were up 36% to \$0.26. GAAP net income for the quarter was up 3% to \$1.02 billion, while non-GAAP net income grew 35% to \$1.36 billion. GAAP revenues were up 26% to \$3.88 billion while non-GAAP revenues were up 32% to \$4.06 billion for the quarter.

Fourth quarter GAAP total software revenues were up 24% to \$3.12 billion while non-GAAP total software revenues were up 31% to \$3.30 billion. GAAP database and middleware new license revenues were up 16% to \$1.26 billion for the quarter, while GAAP applications new license revenues were up 52% to \$350 million for the quarter. GAAP services revenues were up 35% to \$755 million.

“Oracle’s database business delivered another strong growth quarter,” said Oracle CEO, Larry Ellison. “The latest Gartner, IDC and Morgan Stanley database surveys all agree that Oracle is increasing database market share while IBM’s DB2 database is in decline. This quarter marks an acceleration of that trend as more and more companies move their database applications off mainframes onto Oracle Grids.” (See Investor Relations website www.oracle.com/investor.)

“The rapid integration of PeopleSoft into our business contributed to the strong growth in both applications sales and profits that we saw in the quarter,” said Oracle President, Safra Catz. “The combination of increased organic growth plus a carefully targeted acquisition strategy have pushed Oracle’s revenue and profits to record levels.”

“The global field organization turned in a stellar performance with 130% sequential growth in applications in the first full quarter past the PeopleSoft acquisition. Our emphasis on product specialization is producing benefits that we expect to continue in FY06,” said Oracle President, Charles Phillips.

For the full fiscal year 2005, Oracle's GAAP earnings per share increased 10% to \$0.55, and non-GAAP earnings per share increased 31% to \$0.68. GAAP net income was up 8% to \$ 2.9 billion, while non-GAAP net income grew 29% to \$3.5 billion. GAAP revenue was up 16% to \$11.8 billion, while non-GAAP revenue was up 19% to \$12.1 billion.

Fiscal year 2005 GAAP software revenues were up 17% to \$9.4 billion while non-GAAP software revenues were up 21% to \$9.7 billion. GAAP database and middleware new license sales were up 13% to \$3.3 billion, and GAAP applications new license revenues were up 28% to \$785 million. GAAP service revenues were up 14% to \$2.4 billion.

Oracle is the world's largest enterprise software company. For more information about Oracle, including supplemental financial information, please call Investor Relations at (650) 506-4073 or visit Oracle on the web at www.oracle.com/investor.

“Safe Harbor” Statement: Statements in this press release relating to Oracle's future plans and prospects are “forward-looking statements” and are subject to material risks and uncertainties. Many factors could affect our current expectations and our actual results, and could cause actual results to differ materially. We presently consider the following to be among the important factors that could cause actual results to differ materially from expectations: (1) Economic, political and market conditions could adversely affect our revenue growth and profitability. We may fail to achieve our financial forecasts due to such factors as delays or size reductions in transactions, unanticipated fluctuations in currency exchange rates, delays in product delivery, or a decline in our renewal rates for software license updates and product support. (2) We have an active acquisition program, and our acquisitions may not be successful, may involve unanticipated costs or other integration issues, or may disrupt our existing operations. (3) We cannot assure market acceptance of new products or new versions of existing products. (4) Periodic changes to our pricing model and sales organization could temporarily disrupt operations and cause a decline or delay in sales. (5) Intense competitive forces demand rapid technological advances and frequent new product introductions, and could require us to reduce prices. A detailed discussion of these factors and other risks that affect our business is contained in our SEC filings, including our most recent reports on Form 10-K and Form 10-Q, particularly under the heading "Factors That May Affect Our Future Results or the Market Price of Our Stock." Copies of these filings are available online from the SEC or by contacting Oracle Corporation's Investor Relations Department at (650) 506-4073 or by clicking on [SEC Filings](http://www.oracle.com/investor) on Oracle's Investor Relations website at <http://www.oracle.com/investor>. All information set forth in this release is current as of June 29, 2005. Oracle undertakes no duty to update any statement in light of new information or future events.

(1) We compare the percent change in the results from one period to another period using constant currency disclosure. We present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current period results for entities reporting in currencies other than United States dollars are converted into United States dollars at the exchange rate in effect on the last day of the prior fiscal year, rather than the actual exchange rates in effect during the current period. The United States dollar weakened relative to major international currencies in the three months ended May 31, 2005 compared with the corresponding prior year period, contributing 3 percentage points of revenue growth, 3 percentage points to the increase in operating expenses, and 4 percentage points of operating income growth.

(2) Certain prior period balances have been reclassified to conform to the current period presentation.

- (1) We use non-GAAP measures of net income and diluted earnings per share which exclude certain purchase accounting adjustments and expenses that we believe are appropriate to enhance an overall understanding of our past financial performance and prospects for the future. These adjustments to our GAAP results are made with the intent of providing both management and investors a more complete understanding of the underlying operational results and trends, as well as our marketplace performance. The non-GAAP results are an indication of our baseline performance before the effects of business combination adjustments and other charges that are considered by management to be outside of our core business segment operational results. In addition, these adjusted non-GAAP results are among the primary indicators management uses as a basis for planning and forecasting of future periods. The presentation of this additional information is not meant to be considered in isolation or as a substitute for net income or diluted earnings per share prepared in accordance with GAAP.
- (2) In connection with our purchase price allocation, we estimated the fair value of support obligations assumed in connection with business acquisitions made during fiscal 2005. Software license updates and product support revenue related to support contracts assumed in business acquisitions in the amount of \$178 million, that would have been otherwise recorded by the acquired entities, was not recognized as revenue by Oracle in the fourth quarter of fiscal 2005. As customers renew these support contracts over the next year, we will recognize revenue for the full contract value over the support period.
- (3) Non-GAAP adjustment represents stock-based compensation related to unvested stock options assumed in connection with the PeopleSoft acquisition.
- (4) Primarily represents the amortization of intangible assets acquired in connection with our acquisition of PeopleSoft.
- (5) Acquisition related charges primarily consist of in-process research and development expenses, stock-based compensation expenses, as well as personnel-related costs for transitional employees who have been or will be terminated after the completion of the legal entity mergers or integration activities. Stock-based compensation included in acquisition related charges resulted from unvested options assumed in the PeopleSoft acquisition whose vesting was fully accelerated upon termination of the employees pursuant to the terms of these options.
- (6) Restructuring costs include Oracle employee severance and duplicate Oracle facility closures.
- (7) The income tax provision was calculated to reflect a 28.75% and 32.0% tax rate in fiscal 2005 and 2004, respectively.

(1) We believe reporting free cash flow provides more visibility to our ability to generate cash. We believe that this measure is also useful to investors as one of the bases for comparing our operating performance with our competitors. We evaluate free cash flow over a trailing twelve month period versus on a quarterly basis as we manage our business on an annual basis. Free cash flow is not a measure of financial performance under U.S. generally accepted accounting principles and should not be considered in isolation or as an alternative to net income as an indicator of our performance, or as an alternative to cash flows from operating activities as a measure of liquidity. The reconciliation of free cash flow to GAAP operating cash flow is provided above. Certain prior period balances have been reclassified to conform to the current period presentation.

(2) Capital expenditures included \$168.3 million related to the purchase of land and office buildings in the fourth quarter of fiscal 2003 that were previously leased.

(3) Represents capital expenditures as reported in cash flows from investing activities of our cash flow statements presented in accordance with U.S. generally accepted accounting principles.

- (1) The sum of the quarterly financial information may vary from year-to-date financial information due to rounding.
- (2) Oracle tracks new software license revenues by product. Software license updates and product support revenues, along with the services revenues shown here, represent Oracle's estimate of revenues that relate to database and middleware products, as well as application products.
- (3) In connection with our purchase price allocation, we estimated the fair value of support obligations assumed in connection with business acquisitions made during fiscal 2005, resulting in a reduction in software license updates and product support revenues in the amount of \$320 million in our GAAP financial statements. The software license updates and product support revenues shown here, include support revenues in the amount of \$142 million and \$178 million, in the third and fourth quarters of fiscal 2005, respectively, that would have been recognized as revenue by the acquired entities. The as reported (GAAP) growth rates were 48%, 86% and 38% for Q3FY05, Q4FY05 and FY05, respectively. The constant currency growth rates on GAAP basis were 43%, 81% and 33% for Q3FY05, Q4FY05 and FY05, respectively.
