“Oracle’s JD Edwards EnterpriseOne applications enable us to meet the financial and manufacturing management demands of our growing international enterprise. We look forward to continuing to realize the time and cost savings afforded by Oracle’s applications.” – Wendy VandraA, IT Manager, Precision Components Group, ATS Automation Tooling Systems Inc.

ATS Automation Tooling Systems Facilitates Global Expansion with Integrated Enterprise Applications

ATS Automation Tooling Systems Inc. provides innovative custom-designed, built, and installed manufacturing solutions to companies worldwide. Founded in 1978, ATS serves the automation system needs of multinational customers in a variety of industries, including healthcare, computer and electronics, automotive, and consumer products.

Challenges

- Enable rapid access to inventory and sales information
- Provide a flexible IT system capable of accommodating the unique requirements of the company’s varied manufacturing methods
- Allow the company to accurately plan material orders and track spending, while enabling the flexibility to make last minute changes
- Provide multi-language capabilities to facilitate the company’s expansion into China and other nations

Solution

- Deployed Oracle’s JD Edwards EnterpriseOne applications to improve business insight and facilitate company growth
- Allowed ATS to accurately track and analyze spending across the global enterprise, facilitating more cost-effective purchasing of raw materials and engineered products
- Helped ATS to achieve cost reduction targets of 3-5% annually by leveraging accurate purchase information
- Cut time needed to close monthly books by 50%
- Gained multi-currency capabilities, allowing ATS to implement one global financial management system, which enabled more effective management of the business
- Automated asset accounting, saving time and enabling improved efficiency of maintenance operations
- Enabled online access to information, improving maintenance request management and providing around-the-clock access to critical data
