“With Oracle, we created an integrated Web-based content management and collaboration solution, and portal for launching internal applications with Single Sign-on. This was a very cost-effective solution because of our previous experience with developing and deploying custom applications in an Oracle environment.”

– Ross Harris, Senior Manager,
Project Support Office, BC Ministry
of Attorney General

British Columbia Justice Sector Improves Content Management and Collaboration and Leverages Single-Sign on

The British Columbia Ministries of Attorney General and Public Safety and Solicitor General are recognized as national leaders in integrated justice systems, developed and maintained with Oracle Technology. They seek innovative infrastructure-based strategies for managing information.

Challenges

- Remove information silos, enabling greater visibility of information across the organization
- Improve content management and collaboration
- Single Sign-On to Web content and applications
- Enhance information security provisions
- Federated search on multiple Oracle repositories

Solution

- Implemented Oracle Database, Oracle Application Server, Oracle, Oracle Portal, Oracle Collaboration Suite, Oracle Identity Management, and a custom federated Oracle Search, which incorporates Ultra Search. The resulting Web-based content management and collaboration solution improves staff members' ability to securely and rapidly access critical information from across the enterprise
- Enabled secure federated search capabilities with Oracle Database
- Improved the accuracy and speed of content searches and decision making by enabling search capabilities that span multiple data repositories
- Reduced document duplication and version control issues with integrated data infrastructure
- Consolidated the number of passwords required to access the system, enhancing security and reducing the administrative burden on IT staff
- Streamlined system management and administration with effective administrative tools, improving efficiency and productivity
- Worked with The EBS Group, an Oracle partner, to accelerate the implementation and reduce risk
