“With Oracle’s technology, we have succeeded in implementing an extremely reliable disaster recovery solution that offered a reasonable price per performance ratio.” – Michel Pousset, Managing Director, BSG Clearing Solutions GmbH

BSG Clearing Solutions Implements Reliable, Scalable Data Disaster Recovery Solution

BSG Clearing Solutions GmbH was formed in 2005 with the sale of EDS Clearing House in Germany to US-based Billing Services Group (BSG). BSG is a leading provider of settlement services in the telecommunications industry with 750 network operators worldwide. The company’s services include sophisticated billing, clearing, and settlement services to fixed and mobile network operators, as well as to providers in the WLAN, content, and convergence sectors.

Challenges

- Implement an efficient disaster recovery solution that distributes data to two separate business sites
- Provide high availability for systems managing business-critical processes, while simultaneously leveraging existing resources

Solution

- Worked with EDS Operation Services to implement Oracle Real Application Clusters, allowing for integration of a large number of servers and storage facilities
- Delivered an enterprise-wide IT disaster recovery solution
- Provided a flexible system that meets the company’s IT requirements, while allowing users to quickly query for data
- Established two separate computing centers in Rüsselsheim and Frankfurt that each manage high volume database and production servers
- Used Oracle Database and Oracle Application Server 10g to facilitate data processing of several million roaming calls per day
- Offered maximum availability, unlimited scalability, and high performance
