**“Oracle Database Standard Edition is a very reliable database, which gives us operating stability. This is important for our company because it helps us focus on building our brand, instead of worrying about our information or data, which we know are secure.”** – Homero Ambriz Zarate,  
Manager of Information  
Technology, Caja Morelia  
Valladolid

## Caja Morelia Valladolid Consolidates Information and Improves Internal Communication Among Branches

Caja Morelia Valladolid was founded in 1964 in Morelia, Mexico as a non-profit cooperative to offer financial, insurance, and health service to its members. It contributes to the social and economic development of its members in 70 branches in the states of Mexico, Puebla, Guanajuato, Querétaro, Michoacán, and Jalisco.

### Challenges

- Implement a robust, flexible, high-availability IT infrastructure to support the company’s growth
- Centralize information in a robust, reliable database to provide access to large volumes of data and improve communication among branches
- Provide a secure database, easily replicable to external sites, to improve operating efficiency
- Improve client service to its members to increase the company’s competitiveness

### Solution

- Worked with Oracle Consulting and Oracle Partner Dell Mexico to implement a robust, flexible, high-availability IT infrastructure that supported the 75% growth rate of the company and its members
- Centralized information in a robust database with Oracle Database Standard Edition, facilitating secure access to a large volume of up-to-date member information
- Improved internal communication and synergy among the organization’s 70 branches throughout the country
- Provided 100% reliability and security for member information
- Implemented Oracle Real Application Clusters, ensuring applications availability and performance
- Allowed quick, secure database replication to an external site, ensuring efficiency in managing information
