**“Oracle offers consistent results with robust tools, promoting the integration of all clinic units.”**

– Leandro Muller, IT Manager,  
Centro Clínico Gaúcho

## Centro Clínico Gaúcho Unifies Platform and Reduces Management Costs

Centro Clínico Gaúcho is a group medicine company from Rio Grande do Sul, Brazil. The company was founded in 1991 and provides ambulatory and hospitalized medical care, as well as dental care. The center is composed of 21 units. It is present in nine cities in the state of Rio Grande do Sul and has 1,200 employees. The clinic center attends to 3,500 client companies and 180,000 users through chain of associated expert doctors, clinics and hospitals.

### Challenges

- Centralize administration into a common platform in 21 clinic center units
- Automate and modernize the company's technology base, especially in the human resources and comptroller's departments
- Improve performance and offer employees an enhanced internal intranet portal
- Prevent database service interruption and information loss, and define a pro-active performance strategy

### Solution

- Centralized administration with Oracle Database Standard Edition 10g, reducing management costs by 20%
- Guaranteed uninterrupted production due to high availability, keeping systems working around the clock
- Increased company automation by 25% in the human resources and comptroller's departments, facilitating payroll control, cash flow, and billing in all units
- Provided employees with faster access to intranet information with Oracle Standard Application Server
- Relied on Oracle Partner Advanced IT to help the clinic center modernize its technology system in the human resources and comptroller's departments
