**“ClinixMIS’ experience with Oracle validates the claim that smaller businesses can successfully develop business applications using Oracle technology without breaking the ‘bank.’”** – Jerry L. Killough, President & Chief Executive Officer, Clinix Medical Information Services, LLC

**Clinix Medical Information Services, LLC Protects Market Share with Scalable, Flexible, Secure IT Infrastructure**

With more than 25 years of healthcare and technology experience, Clinix Medical Information Services, LLC (ClinixMIS) provides hosted medical business management solutions to medical billing companies, medical services organizations (MSOs), and physician practices across the United States. Utilizing an application service provider (ASP) platform, ClinixMIS helps customers increase efficiency and improve collections while limiting initial start-up investments and upgrade costs over time.

**Challenges**

- Maintain ClinixMIS’ competitive advantage through the delivery of distinctive services and solution functionality
- Ensure growth and profit by implementing advanced technology
- Ensure the scalability, performance, and security of ClinixMIS’ IT infrastructure

**Solution**

- Standardized on Oracle technology and utilized Oracle Enterprise Development modules to create ClinixMIS’ CLINIX product offering, which enables healthcare organizations to improve billing and accounts receivable management and enhance physician office workflow management
- Created a highly scalable IT infrastructure that allows ClinixMIS to support the processing of more than \$750 million in healthcare provider charges and 3.6 million claims annually
- Ensured a highly scalable, reliable, available, and secure system to meet company and customer requirements
- Implemented Oracle Reports and Oracle Forms, enabling ClinixMIS to offer its clients extremely robust reporting and forms features, which help to distinguish CLINIX in the market
- Reduced deployment time and learning curve for developers with Oracle development tools
