“We have saved an incredible amount of money on resources using Oracle applications. Now we can host the applications from a central location, and the upgrades and implementations have become much simpler and less expensive.” – Donald J. Moss, Director of Information Systems, Coeur d'Alene Mines

Coeur d'Alene Mines Consolidates Information, Speeds Processing and Reduces Costs

Coeur d'Alene Mines is the world's leading silver and gold producer. The company has mining interests in the United States, Argentina, Australia, Bolivia, and Chile. Coeur d'Alene Mines specializes in developing natural resources, while protecting and preserving the environment for tomorrow.

Challenges

- Centralize heterogeneous financial information and increase integration between the company's global branches
- Increase efficiency by providing employees with access to on line business information
- Improve the company's ability to communicate in multiple languages, improving the accuracy of communications

Solution

- Implemented Oracle E-Business Suite applications to create an integrated and highly scalable IT infrastructure that helps the company reduce processing time and accelerate business-change adoption between branches in various countries
- Provided employees around the globe with real-time online information that drives improved financial management and operational efficiency
- Automated and integrated financial information using Oracle Financials, allowing the company to streamline currency and language conversion, and improve speed and accuracy in reporting
- Centralized financial information and enhanced the ability to analyze data for a more efficient decision making
- Optimized resources and reduced time-and-labor costs
- Expanded ability to track purchasing and sales data
- Guaranteed a reliable and robust database in order to obtain better control of critical information regarding affiliates, subsidiaries and pensions with Oracle Database
- Improved employee productivity, and provided greater access to important business data and processes with Oracle Enterprise Manager
