Industry:

Industrial Manufacturing,
Wholesale & Resale Operations

Annual Revenue:

\$55 million

Employees:

340

Oracle Products & Services:

Oracle Database 10g Standard Edition One
Oracle Application Server Enterprise Edition
Oracle Developer Suite

“Implementing secure and reliable Web dashboards built on Oracle Database 10g Standard Edition One proved to be very easy. It’s nice to look at a product and say ‘five years from now, we’ll still have a system that can grow as fast as we’re growing.’” – Chuck Berry, Senior IT Manager, Copper State Bolt & Nut Co.

Copper State Bolt & Nut Co. Gains Enterprise-class Reliability and Functionality with New Data Infrastructure

Copper State Bolt & Nut Co., founded in 1972, is a manufacturer and distributor of fasteners, power tools, construction equipment and related products. Based in Phoenix, Arizona, the company has 17 distribution centers and manufacturing facilities throughout the Southwest United States.

Challenges

- Implement a cost-effective, yet feature-rich data infrastructure to support continued growth and new business applications
- Ensure IT scalability
- Implement and manage the new data infrastructure without outside help to keep costs low

Solution

- Implemented Oracle Database 10g Standard Edition One—a system designed for small-to-midsized businesses—to create an affordable and scalable enterprise-strength data infrastructure that supports the company’s continued growth
- Improved data infrastructure reliability and business application performance
- Enabled real-time reporting capabilities
- Enhanced business intelligence and improved decision-making capabilities with real-time information dashboards
- Quickly implemented the database and related tools without outside assistance or consultants, reducing costs and minimizing business disruption
