“Oracle Financials ensured we were able to standardize business processes on an open platform with maximized added value and high functionality.”

– Piet Schreurs, Manager
Applications Group Packages, De
Post – La Poste

De Post – La Poste Improves Order Management with Standardized Enterprise Resource Planning Solution

De Post – La Poste is a Belgian limited liability company under public law. Since 2006, the company has been an active member of a consortium that includes Post Danmark and CVC Capital Partners. De Post – La Poste offers mail-related solutions, such as domestic and international mail services, to approximately 4.5 million residents and one million businesses in Belgium, as well as other European countries.

Challenges

- Select and implement applications for financial management and procurement
- Ensure the company’s ability to integrate the new solution with its existing custom-built applications
- Standardize business processes on an open platform, while maintaining the company’s investments in best-of-breed technologies

Solution

- Implemented Oracle Financials and Oracle Procurement to standardize the company on an open, enterprise resource planning platform
- Collaborated with Oracle Partner IBM to efficiently and securely implement the Oracle solution and ensure successful integration with the company’s in-house, custom solutions
- Provided De Post – La Poste with streamlined order management functionality and tools to enable successful integration with the company’s custom order management systems
