“Implementing Oracle’s back-office solutions and tools has allowed a company with international reach, such as DLS Argentina Limited, to fulfill our proposed business objectives.”

– Juan Leoni, Systems
Department Manager, DLS
Argentina Limited

DLS Argentina Limited Unifies Financial Processes and Business Information on Scalable IT Infrastructure

The Argentinian branch of DLS Argentina Limited has been in the petroleum service industry for more than 35 years. The company’s technology team and other employees have worked in distant oil and gas fields around the world. DLS was the first company to operate in continental platforms in Argentina and has carried out drilling projects with semi-submerged platforms in the minefields and basins of Colorado, the San Jorge Gulf and the Austral Marina in Argentina, Turkmenistan and Azerbaijan.

Challenges

- Guarantee dependable information 24/7 online and in real-time
- Unify information between the organization’s branches and offices across the country
- Connect business operations between branches in Bolivia and Argentina with DLS’s central offices through a Web presence
- Standardize work security and safety policies with the objective of avoiding and reducing worker and oil platform accidents
- Integrate and streamline financial and human resources processes

Solution

- Worked with Interservices Management Company Ltd. to establish a flexible and scalable technology platform
- Integrated operations between the branches, achieving online and real-time internal communication between employees
- Integrated financial processes with PeopleSoft Enterprise applications for financial management, improving visibility into and the quality of data as well as accelerating report creation
- Optimized the assignment, training, and management of human resources with PeopleSoft Human Capital Management
- Allowed for visibility and transparency of distinct processes with PeopleSoft Enterprise Supply Chain Management, facilitating better decision making
- Standardized work security and safety policies, reducing the occurrence of accidents on oil platforms from 16% to 4%
