“With Oracle’s help, we’ve been able to meet the challenge of building a solid and unified IT infrastructure, which can respond quickly and is ready for Exolgan’s rapid growth. It also lets us offer excellent service to our customers.” – Sebastian Iglesias, Systems Manager, Exolgan S.A.

Exolgan S.A. Improves Port Logistics Processes with a Unified IT Infrastructure

Exolgan S.A. is Argentina’s largest port logistics and container shipping company. It specializes in developing, coordinating, integrating, and managing logistics and port procedures. It is Argentina’s largest container shipping terminal.

Challenges

- Implement a unified, scalable, high-availability IT infrastructure to support the company’s growth
- Extend visibility of reliable, up-to-date information throughout the organization
- Automate port logistics procedures to achieve efficiency in loading, unloading, sending, and receiving shipping containers
- Accelerate port logistics operations to ensure that it fulfills productivity agreements with shipping companies

Solution

- Worked with Oracle partner Star Technology and Snoop Consulting to implement an IT infrastructure with unified applications that supported the company’s growth
- Consolidated information in a secure database with Oracle Database Enterprise Edition, extending information visibility throughout the organization
- Provided access to up-to-date information with Oracle Warehouse Builder, facilitating timely analysis and decision making by upper management
- Automated port logistics and client service operations, helping the company manage its growth rate of 30%
- Implemented Oracle Data Guard, ensuring load balancing and high functional availability for applications, which are essential in the transportation business
- Reduced time required to process massive amounts of information, accelerating the time for closing monthly accounts from 20 days to an automatic process
- Accelerated port logistics operations with BPEL Process Manager, facilitating compliance with productivity agreements with shipping companies
