– Marcelo Hernández, Technology Manager, FLENI Group

## FLENI Optimizes Medical Process and Reduces Access Time to Patient Data

The Foundation for the Fight Against Childhood Neurological Diseases (FLENI) is a public organization dedicated to the prevention, diagnosis, assistance and research of diseases in children, teenagers and adults. FLENI has two main centers: the Raúl Carrera Center for Neurological Research (Belgrano Center), located in Buenos Aires, and the Rehabilitation and Education Therapy Center, in the city of Escobar.

### Challenges

- Effectively manage the Centers' critical financial, administrative and patient data
- Deploy systems to optimize the management of medicines and disposable materials
- Implement IT tools to effectively administer the Centers' accounting and management applications
- Reduce data-access time and implement accurate invoicing procedures

### Solution

- Implemented JD Edwards EnterpriseOne applications, providing the nursing department with a tool to systematize pharmacy processes and stock movements
- Reduced access time to patient data, facilitating the work of the nursery and pharmacy
- Implemented appropriate inventory controls
- Implemented management and accounting applications to improve business processes and control
- Supported decision making by reducing the time needed to update management information
- Ensured non-stop system operation
- Collaborated with Oracle Partner Grupo Assa to implement and test the JD Edwards solution
