“PeopleSoft Enterprise Financials Management facilitated corporate management, supplying reliable tools to our users and to the IT staff.” – Érlen Angelo
Abatayguara, IT Manager, Group Tejofran

Group Tejofran Improves Financial Performance and Facilitates Enterprise Management

Grupo Tejofran was founded in 1957 to provide outsourcing services in the areas of cleaning, electronic security, sanitation, railroads, ambient cleaning, traffic, energy, civil construction, and agribusiness. The company offers a broad variety of services that range from consultancy and project and system implementation to customers of the private and public sectors.

Challenges

- Integrate all areas of the business into a single platform to substitute legacy systems while maintaining service continuity
- Update the database in a safe way, guaranteeing information system integrity
- Improve performance in the areas of accounting, payables, receivables, financial reports, and staff management
- Make available information online to speed up decision making

Solution

- Implemented an array of Oracle’s PeopleSoft Enterprise Financials Management (ESA) applications guaranteeing close to 100% availability and increasing overall IT performance
- Increased the productivity, the operational speed of the accounting, payables, and receivables departments, providing more time for data analysis
- Saved time in IT administration with Oracle’s PeopleSoft Enterprise Service Automation solution by consolidating on one single platform serving the whole group
- Reduced time in the processing of information and report generation, improving team performance in all areas of the group
- Promoted greater credibility and reliability in the management of the company’s accounting and financial data
- Speeded the decision making through better availability of accounting and financial information
