“The JD Edwards EnterpriseOne solution improved data quality and sped up the provision of accounting statements and other information. It gave us deeper insight into our financial and operational processes, improving competitiveness.”

– Tan Hak Jin, Group Financial Controller, Hiap Seng engineering Ltd.

Hiap Seng Standardizes Financial and Supply Chain Management with Integrated ERP System

Hiap Seng Engineering Ltd (HSE) provides a wide range of engineering services to the oil and gas, petrochemical, oil terminals, chemical, pharmaceutical, power plant, and infrastructure industries. It offers engineering, procurement, and construction services, project management, and plant maintenance services. The Singapore-based company has offices in Malaysia and Thailand.

Challenges

- Increase business process efficiency
- Improve data integrity
- Provide greater visibility of project costs
- Enhance reporting capability
- Leverage the latest technologies to boost competitive advantage

Solution

- Installed a range of JD Edwards EnterpriseOne applications from Oracle as new business management platform
- Selected Oracle Certified Partner S&I Systems to implement the solution, ensuring a quick, cost-effective, and trouble-free deployment
- Increased efficiency and cut costs by standardizing financial, procurement, and logistics processes enterprise-wide
- Improved project management by giving staff the ability to track project costs on a daily basis
- Reduced error rate and achieved single version of the truth by creating a single, standardized chart of accounts
- Provided staff in multiple locations with online access to JD Edwards EnterpriseOne solution
