**“Our experience upgrading to JD Edwards World A9.1 has been extremely positive. The new upgrade tools made it virtually painless, and we’ve gained significant new functionality, with more modern technology that helps us run our business more efficiently. Best of all, we upgraded on our own terms thanks to Applications Unlimited.”** – Karl Schosser, Vice President of Information Technology, Hunt Building Corporation

**Hunt Building Corporation Upgrades Enterprise Applications for Easier Integration and Use**

Founded in 1947, Hunt Building Corporation and its affiliated companies provide a full range of development, design-build, construction management, investment, and asset/property management services across the country with a focus in public-private ventures, military housing, mixed-us, master-planned communities and retail. The companies have been headquartered in El Paso and operated by the Hunt family for four generations. Hunt has completed or is currently building/developing over 83,000 housing units, of which 65,000 are military family homes. Currently, Hunt has completed military housing projects in 38 states, representing more military family housing projects in the United States than any other entity. Other Hunt affiliate companies are Hunt Building Company, Hunt Communities, HBC Property Managers, Hunt NR, and Hunt Administrative Services.

**Challenges**

- Implement modern, easy-to-use IT infrastructure to enable new levels of operational efficiency
- Complete the company’s first upgrade to its enterprise resource planning (ERP) applications in approximately 10 years
- Gain the ability to integrate multiple applications with ease
- Protect the company’s IT investment going forward

**Solution**

- Upgraded to JD Edwards World A9.1 to deliver enhanced functionality, including a Web-based application environment that is easier to roll out and use
- Simplified importing and exporting of data between the company’s nearly 100 different applications
- Gained a more intuitive, user-friendly interface, which is especially appealing to the company’s increasingly younger workforce
- Completed the successful upgrade in three months, with little interruption to end users
- Benefited from Oracle’s Applications Unlimited initiative, which allowed the company to upgrade at its own pace with guaranteed lifetime support for its older applications
- Empowered the IT staff to make strategic decisions and meet budgetary concerns
