“Oracle offered us complete solutions that provided the appropriate infrastructure and a solid platform that we needed to guarantee future growth.”

– Frank Adam Mendoza,
Marketing Manager, Industrias
Uniplásticas C.A.

Industrias Uniplásticas C.A. Integrates Information and Unifies Administrative Processes

With more than three decades in the Venezuelan market, Industrias Uniplásticas C.A. is a company that produces and markets high-quality plastic products. Operating under the commercial name Uniplast, the company produces products designed to offer solutions for merchandise handling, construction, services and agro-industrial development. Many qualities distinguish the company's products: they are easy to wash, sterilize, or freeze; they are 100% recyclable; and they can be used and stored in open-air conditions. Today, Industrias Uniplásticas C.A. has a level of growth that positions it at the forefront of foam-structured plastic production in South America.

Challenges

- Support sustained growth in material sales that reach 2,000 tons annually with an improved technological infrastructure
- Unify administrative processes and provide real-time access to internal information
- Manage problem identification and analysis in production and administration areas in order to facilitate quick and efficient decision making

Solution

- Improved end-of-the-month times offering the company the opportunity to deliver detailed information analysis and financial results
- Reduced inquiries made by marketing personnel in the inventory area providing them with easier access to updated information
- Maximized employee productivity and performance as a result of automating purchases with PeopleSoft Enterprise Purchasing
- Improved control of their cash flow, minimizing errors and eliminating inconsistencies by using specialized payment tools with PeopleSoft Enterprise Payables
- Achieved availability of financial information 24x7 with Oracle BPEL Process Manager
- Obtained better control of daily production with PeopleSoft Enterprise Supply Chain Management applications
