“Satyam understood our business and partnered with us on all phases: from product selection to design, implementation, training, and post go-live support. Satyam’s implementation methodology is among the best in the industry, which helped us complete the project on time and to budget.”

– Srinivas Sagi, CIO, Maytas Properties

Maytas Properties Achieves More Effective Cost Reporting and Better Credit Control

Maytas Group is a leading infrastructure development, construction, and project management company. Maytas Properties, a subsidiary of the group, is a leading real estate company based in Hyderabad, India. The company is currently developing residential townships and commercial buildings, retail infrastructure, hotels and setting up special economic zones (SEZ) across the Indian subcontinent.

Challenges

- Install an integrated Web-based business management system to enable around-the-clock access to information
- Provide real-time visibility into project costs and revenues to help the management team make effective decisions
- Gain the ability to track and report project costs
- Ensure support for future business needs
- Adopt industry best-practice business processes

Solution

- Selected a range of JD Edwards EnterpriseOne applications from Oracle to build an integrated financial, distribution, project costing, and real estate management system
- Achieved a smooth installation by engaging Oracle Certified Advantage Partner Satyam Computer Services to configure, customize, and roll out the solution
- Facilitated more effective project costing and better credit control and monitoring
- Increased efficiency by adopting best-practice guidelines
- Enabled faster response times for issues related to payments, receipts, and unit availability
- Provided greater transparency of customer accounts and building availability
- Achieved quick return on investment with low-cost, low maintenance solution
- Met changing business needs with highly scalable system
