“Modularity and the ability to blend functionality appeared to be easier with Oracle than SAP. Oracle has shown us that they are a true partner through supporting us with added functionality as we developed.”

– Michael Bodman, Vice President, Merichem Chemicals and Refinery Services, LLC

Merichem Chemicals and Refinery Services, LLC Automates Business Process and Reduces Costs

From its beginnings more than 55 years ago in the specialty chemical business, Merichem Company has grown to be a world leader in innovative process technology as well as the production of high specification chemical intermediates. Through their wholly owned subsidiary, Merichem Chemicals & Refinery Services LLC (MCRS), Merichem Company provides an array of technologies, services, and chemicals for solving the problems of their customers. MCRS offers engineering solutions and fabricated systems for treating light hydrocarbon streams and gases, proprietary catalysts, chemical co-product management services, and a diversified portfolio of products and services to the refining, gas processing, chemical, and pulp and paper industries worldwide.

Challenges

- Create an IT infrastructure that can support present operations and future growth
- Standardize business processes
- Reduce transactional costs

Solution

- Deployed Oracle E-Business Suite to create a highly scalable and reliable IT environment that helped MCRS to standardize business processes and improve decision-making capabilities
- Elected to run its applications through Oracle On Demand, making it possible for the company to run sophisticated applications without having to contend with upgrades, customizations, or scalability issues
- Integrated and automated the procure-to-pay and order-to-cash processes, driving improved operational efficiency
- Promoted information transparency, which provided a better understanding of the company's financial position
- Improved acquisition management
- Reduced transactional costs
- Ensured a timely and affordable implementation with Oracle On Demand
