**“Oracle On Demand enabled a seamless transition from our previous system and provided scalability for the future as we work to meet our aggressive growth goals.”** – David Leckie, Director of Information Technology, OVISO Manufacturing

**OVISO Manufacturing Ensures Business Continuity and Scalability with Hosted IT Infrastructure**

OVISO Manufacturing is a contract manufacturer, serving customers in diverse industries that span the semiconductor capital equipment, aerospace, industrial gas turbine, and medical equipment and instrumentation markets. OVISO applies lean manufacturing principles and concurrent engineering techniques to provide customers with high-quality products at competitive prices. OVISO operates manufacturing facilities in the United States, Mexico, and China.

**Challenges**

- Expedite the implementation of a new IT infrastructure within six months as the company completed its spinoff from ESCO Corporation
- Ensure business continuity during the transition
- Provide a scalable solution to meet aggressive growth targets
- Provide ready access to IT expertise without the costs and challenges of building an extensive in-house IT team

**Solution**

- Selected Oracle On Demand to host and manage the company’s Oracle E-Business Suite applications
- Met the six-month deadline and ensured business continuity as the company completed its transition
- Provided a single instance of Oracle E-Business Suite applications to more than 200 users across five facilities
- Minimized customizations to achieve a more tightly integrated IT infrastructure, contain maintenance costs and IT complexity, and facilitate system upgrades
- Met or exceeded all service level standards with the initial roll out of Oracle On Demand
- Ensured high availability and avoided the costs, management challenges, and steep learning curve of an on-premise deployment
- Ensured access to highly skilled Oracle experts without the need to significantly expand OVISO’s in-house IT team
- Provided scalability to meet the company’s aggressive growth target over the next three to five years
