**Perupetro S.A.**

Perupetro is a private, state run company that promotes the advancement of hydrocarbon exploration and production activities in Peru. As part of its charter, the company negotiates, signs, and supervises hydrocarbon exploration and exploitation contracts in accordance with the guidelines and policies established by the Peruvian Ministry of Energy and Mines.

**Challenges**

- Consolidate legacy systems to increase productivity and realize cost savings associated with technology maintenance
- Expand the company's ability to accurately forecast and manage projects and initiatives
- Improve operational efficiency

**Solution**

- Centralized information and applications on Oracle Database, achieving a single source of real-time data and reducing IT management costs
- Implemented Oracle Financial and Sales Analyzer, enabling Perupetro to quickly analyze performance, develop new plans, and revise budgets and forecasts for improved financial performance
- Increased productivity and streamlined administrative tasks with automated reporting and expanded data analysis capabilities
- Consolidated business information in a user-friendly, dynamic, and easy-to-use Web-based environment
- Expanded visibility of critical financial and operational data across the enterprise, enabling faster and more accurate decision making
- Achieved rapid implementation of new systems with Oracle Certified Partner TSnet S.A.
