Oracle Database

**“We needed a bullet-proof infrastructure for our service, and Oracle has a great reputation for providing reliable, high-performance, and scalable technology.”** – Aaron Freeman, Founder, SendThisFile, Inc.

**SendThisFile, Inc. Provides Customers with Reliable Solution**

SendThisFile, Inc. is an Internet service that allows businesses and consumers to easily send large files to their clients, employees, friends, and families. The company has more than 400,000 users.

**Challenges**

- Implement a secure, highly available database to protect sensitive information and improve customer service
- Increase competitive advantage through enhanced product offerings
- Ensure IT infrastructure scalability to accommodate future growth

**Solution**

- Moved from a MySQL back-end system to Oracle Database 10g on Linux to enhance credibility with customer base and provide world-class support
- Improved data infrastructure performance, security, availability, and scalability
- Created a seamless path for future upgrades
- Implemented system on time and within budget
