“Oracle SOA Suite and Oracle BPEL Process Manager give Tarjeta Nevada the quick, versatile platform it needs to process 500,000 monthly authorizations and provide total information security and operating continuity.”

– Leonardo Sergio Falciani,
Manager of Development, Tarjeta Nevada

Tarjeta Nevada Accelerates Credit Card Authorization Response by 50%

Tarjeta Nevada started in 1996 as a service card, specially designed to respond to the needs and expectations of consumers in Argentina. Today, Tarjeta Nevada is Argentina’s nonbank credit card leader, serving 400,000 customers and a network of 25,000 associated businesses through its operations in 12 provinces.

Challenges

- Provide a flexible, up-to-date, high-availability IT infrastructure to guarantee secure information access and transfer, as well as operational continuity
- Accelerate time required to authorize credit-card purchases to improve the company’s competitiveness
- Maintain a historical record of operations and transactions to provide statistics on account statements, sales, credits, and debits for customers and associated businesses

Solution

- Worked with Oracle Partner Ayi & Asociados to create an integrated application infrastructure built on a flexible, high-availability platform
- Implemented Oracle Database Enterprise Edition with Real Application Clusters and Oracle’s Automatic Storage Management option to reduce system downtime and ensure operational continuity
- Accelerated system response time for credit-card purchase authorizations by 50%
- Created a high-availability authorization system to handle more than 500,000 monthly authorizations
- Improved security for access and transfer of client financial information
- Created an historical record of transactions using BPEL Process Manager, providing follow-up and traceability for transactions and facilitating service for customer claims
- Accelerated the time required to transfer administrative information by 80%
- Reduced IT administration and maintenance costs by 20%
