“With Oracle’s PeopleSoft Enterprise Financial Management solution, we consolidated our information and brought independence to each one of our centers.”

– Rosana Corona, Corporate Administrative Director, Fundación Teletón

Fundación Teletón Consolidates Operations at Regional Rehabilitation Centers

Fundación Teletón collects money and donations to support social assistance projects for people with disabilities. The social aid project started in 1997 with the idea of celebrating the spirit of community and national unity. Fundación Teletón is now the largest charity in Mexico with thousands of companies, institutions, and small stores that have joined the cause and made donations for the construction of children’s rehabilitation centers.

Challenges

- Modernize administrative software and consolidate databases across business units
- Implement administrative systems for the Web environment, expanding access and increasing availability
- Automate donation processes and controls

Solution

- Implemented Oracle’s PeopleSoft Enterprise Financial Management applications, enabling the integration of regional rehabilitation centers with headquarters
- Updated consulting information in real time to support fast, accurate decision making
- Improved organizational management with real-time information access and more accurate data
- Chose Oracle’s software-as-a-service delivery model in collaboration with Oracle partner MasNegocio, who offered extensive value added services, including application and database management, maintenance and hosting, and helpdesk services
- Ensured high level of service reliability and system optimization
