**“Since implementing Oracle’s JD Edwards EnterpriseOne applications, we have continued to gain strength through continuous operational and efficiency improvements to manufacturing and planning processes.”** – Hugo Bovill, Managing Director, Treatt Plc

### Treatt Improves Business Agility to Boost Sales

Treatt Plc, a world-leading supplier of ingredients which include essential oils and aroma chemicals to the flavor and fragrance industries, exports to more than 90 countries from its manufacturing sites in the United Kingdom and the U.S. The company’s products are found in a wide range of goods including cosmetics, soft drinks, confectionery, and pharmaceuticals.

#### Challenges

- Manage global growth while reducing order lead times by synchronizing manufacturing facilities in the U.K. and U.S.
- Optimize supply chain and manufacturing efficiencies and leverage economies of scale to achieve best prices
- Gain global financial overview and real-time intelligence
- Grow margins by automating documentation production and enabling collaboration with suppliers, partners, and sales agents

#### Solution

- Worked with Whitehouse Consultants Ltd. to replace legacy systems in the U.K. and U.S. with a single instance of Oracle’s JD Edwards EnterpriseOne to consolidate financial management, purchasing, and supply chain processes
- Worked with Whitehouse Consultants to build interfaces with third-party solutions to create a unified global business
- Used JD Edwards EnterpriseOne Supply Management to streamline sourcing, optimize production schedules, and maximize available manufacturing capacity at both plants
- Improved delivery times to multinational customers by coordinating order fulfillment across both production plants
- Automated supply chain collaboration and cut administration costs by enabling sales agents to place and track orders online
- Used JD Edwards EnterpriseOne Procurement and Subcontract Management to purchase best-value materials and build strategic supplier relationships
- Created a single general ledger, closed books faster, improved reporting timeliness and accuracy, and streamlined compliance using JD Edwards EnterpriseOne Financial Management
- Improved service delivery and achieved higher margins and a 9% increase in sales in the third year
- Realized significant value from investment through Oracle’s lifetime support and applications unlimited commitments
