**“With relation to company business processes support, Oracle E-Business Suite was a serious step forward for VimpelCom Group. The company gained a tool that can support tens of thousands of users across our service.”**

– Nesteruk Konstantin, Project Manager for Enterprise Resource Planning, VimpelCom Group

**VimpelCom Group Drives Operational Efficiency and Ensures Compliance with Integrated IT Infrastructure**

VimpelCom Group consists of telecommunication operators providing voice and data services through a wide range of wireless, fixed, and broadband technologies. The group includes companies operating in Russia, Kazakhstan, Ukraine, Tajikistan, Uzbekistan, Georgia, and Armenia.

**Challenges**

- Standardize business processes for hundreds of locations in a vast geographical area
- Create a scalable and robust application infrastructure to support the company’s rapid growth in the region
- Enable timely financial reporting to meet financial market and government requirements
- Deploy a system that provides the flexibility to meet the company’s unique needs, such as consolidation of transaction and supply data across many regions and departments

**Solution**

- Implemented Oracle E-Business Suite to create a highly scalable and flexible IT infrastructure that will support the company’s rapid growth in Europe and Asia
- Optimized reporting, accelerated financial closes, and provided support for users across 11 time zones
- Supported initiatives to ensure Sarbanes-Oxley compliance, a requirement for its listing on the New York Stock Exchange
- Created a virtual marketplace that allows accurately evaluating vendor proposals and current logistical needs, driving smarter decisions, and saving millions of dollars annually
- Reduced inventory requirements by 27% within six months with extended visibility of inventory, equipment, and supply chain requirements in all subdivisions
- Provided new flexibility to employees and reduced administrative staff burden with self-service human resources capabilities
- Enabled company employees to manage personal and benefit information online at their convenience
- Worked with Oracle Consulting, and Oracle Partner AT Consulting to ensure smooth implementation and leverage best practices
