- Key performance improvement

Intergraph Leverages New Features of Oracle Database 11g

"The entire Intergraph organization is honored to be included in the esteemed *InformationWeek* 500. We at Intergraph have a long and proud history of technical innovation and continue to set the standard in providing spatial information management software to our clients. We are proud of this achievement and look forward to continuing to be at the forefront of innovative technology."—R. Halsey Wise, President and CEO, Intergraph

Intergraph is a leading global provider of geospatially powered solutions that serves a variety of industries. Intergraph solutions organize vast amounts of complex data into understandable visual representations. These visual images help customers make better and faster operational decisions that are vital to the safety and well-being of millions of people around the world every day.

Intergraph Security, Government, and Infrastructure (SG&I) is a geospatially powered solution for customers working in security, government, and infrastructure. Customers in more than 100 countries rely on Intergraph's deep domain expertise and industry-specific solutions to manage critical assets, prevent and respond to incidents, and support mobile resources.

Enterprise Engineering Software

Intergraph Process, Power, and Marine (PP&M) is the world's leading enterprise engineering software for the design, construction, and operation of plants, ships, and offshore facilities. Intergraph software creates, manages, and uses critical engineering data to increase productivity and enable safe and clean operations.

Engineering, procurement, construction firms and owner/operators rely on Intergraph and have confidence in its solutions because they are built on Oracle's Database 11g. As the industry's market leader, Intergraph's commitment to customer success is recognized around the world.
