Industry:

Higher Education

Annual Revenue:

US\$25 million

Employees:

150

Oracle Products and Services:

Oracle Database 11g
Oracle Real Application Clusters

Key Benefits:

- Highly scalable, secure, and reliable database platform with lowest total cost of ownership
- High fault-tolerance enabled customers to meet industry compliance requirements

"Milletech's higher education customers demand a scalable and highly available database platform for running mission-critical grants management applications. Oracle Database provides all the mission-critical features demanded by our customers at the lowest cost of ownership."

—Nasir Mujawar, Vice President, Milletech Systems, Inc.

Milletech Systems Inc. offers a comprehensive portfolio of software products and IT consulting services for higher education. Coupled with extensive domain expertise, Milletech's IT practices leverage Oracle Database technology to deliver a broad spectrum of technical solutions to customers worldwide. With their flagship product, ReARTS, Milletech is a proven leader in grants management solutions for higher education institutions.

Government compliance requirements warrant higher education institutions to be responsible and accountable for all allocated grants. Higher education institutions need a database that can provide a reliable, secure, and highly available infrastructure that includes efficient backup and recovery mechanisms as well as low total costs of ownership and maintenance .

Milletech used Oracle Database 11g and Oracle Real Application Clusters (Oracle RAC) to deploy their ReARTS grants management application. This enabled their customers to start with a smaller footprint and scale up as needed, saving millions of dollars on upfront hardware costs. An Oracle RAC database is a single database image, irrespective of the number of nodes.

Oracle RAC helped Milletech's customers save up to 200 percent in upfront hardware purchases and scales on demand using commodity hardware.

Oracle Database running on Oracle Real Application Clusters enables Milletech to provide a highly scalable, available, and secure database platform to customers.

Improved backup and recovery mechanisms enable customers to run and restore backups with ease, reducing maintenance costs.

Milletech Systems, Inc. is a fully integrated IT consulting and solutions company providing development, customization, and integration services in enterprise applications, and e-commerce and mobile solutions to companies of all sizes.
