

**PEROT SYSTEMS CORPORATION**

Plano, Texas
www.perotsystems.com

INDUSTRY:

Healthcare IT

ANNUAL REVENUE:

US\$2.72 billion

EMPLOYEES:

22,000

ORACLE PRODUCTS AND SERVICES:

Oracle Database 10g
Oracle Real Application Clusters

KEY BENEFITS:

- Key performance improvement
- Near linear scalability
- Fault tolerance

Perot Systems Demonstrates High Scalability and Performance

"The approach taken to confirm Oracle Real Application Clusters' scalability with Perot Systems' leading healthcare payer technology was rigorous and well-constructed. The results of this test plan execution clearly show excellent scalability of Perot Systems' application with Oracle Database 10g and Oracle Real Application Clusters."—Angelo Pruscino, Senior Vice President Clustering Technology, Oracle

A study undertaken at Oracle Enterprise Technology Center labs in Atlanta, Georgia, demonstrates the scalability and performance of Perot Systems' leading healthcare payer technology on Oracle Database and Oracle Real Application Clusters.

The study used real customer data from one of Perot Systems' long-term healthcare payer customers, and represented approximately 5 million members in total (2.3 million active members), and eight years of historical data. A real production load was simulated to help reflect the performance expected in a customer production environment.

The benchmark results establish fault-tolerance, high performance, and near linear scalability in claims throughput. Further, the results of the study verify that performance improved across the breadth of the systems' key functional modules with the addition of Oracle Real Application Clusters.

This helps pave the way for health plans to use Perot Systems with Oracle Real Application Clusters with ease to support their growing memberships. Oracle Real Application Clusters, a component of Oracle Grid Computing, enables organizations to incrementally add servers to their database cluster, allowing their applications to adapt easily to growing business demands without disruption.

"The results of this study confirm our vision of a leading core administrative system with the power to help healthcare payers fuel growth," said Jim Mapes, Vice President of Perot Systems' healthcare process solutions group. "With the help of Oracle, Perot Systems is able to document the outstanding performance of this technology."

Perot Systems is a Certified Partner in the Oracle PartnerNetwork. To request a copy of the complete benchmark study, please e-mail Perot Systems at healthcare@ps.net.

About Perot Systems

Perot Systems (NYSE: PER) is a worldwide provider of information technology services and business solutions. Through its flexible and collaborative approach, Perot Systems integrates expertise from across the company to deliver custom solutions that enable clients to accelerate growth, streamline operations, and create new levels of customer value.

Headquartered in Plano, Texas, Perot Systems reported 2006 revenue of US\$2.3 billion. The company has more than 22,000 associates in North America, Europe, and Asia.

About Oracle Partner Network

Oracle PartnerNetwork is a global business network of more than 19,500 companies that deliver innovative software solutions based on Oracle software. It provides partners with the resources they need to be successful in today's global economy. Oracle partners can offer their customers leading-edge solutions backed by Oracle's position as the world's largest business software company.
