

ORACLE APPLICATION SERVER INSTALLATION SERVICE

Oracle Expert Services

ORACLE EXPERTS WILL:

- Install Oracle Application Server
- Configure Oracle Application Server to meet your specific needs
- Complete the install quickly and according to Oracle best practices
- Comprehensive knowledge transfer of Oracle best practices directly to your team

Are you ready to reap the benefits of using Oracle Application Server? Does your team lack the time or the technical ability to properly conduct the installation? If yes, Oracle Application Server Install is an Oracle Expert Install service that offers a complete, standard installation of Oracle Application Server. Oracle experts will use the latest Oracle best practices to set up, install, and configure Oracle Application Server to meet your specific requirements.

Overview

Oracle Application Server, a key component of Oracle Fusion Middleware, offers full support for J2EE, high-speed caching, rapid application development, enterprise portals, identity management, business intelligence, application and business integration, wireless capabilities, and more—all pre-integrated to save you time and money. Plus, Oracle Application Server is optimized for the Oracle Database. This combination makes applications more reliable and easier to manage.

Oracle Application Server Install offers a complete, standard installation of Oracle Application Server, including set-up, installation, configuration, and direct knowledge transfer to your team. Oracle's experts will work with you to understand your application server requirements and configure Oracle Application Server to meet those requirements, based upon Oracle's best practices.

Scope of the Offering

Oracle experts will set up and complete a standard installation of Oracle Application Server including:

- Middle-tier environment
- Infrastructure environment

The runtime components of the Oracle Application Server sit on the installed middle-tier environment. The middle-tier also contains fundamental components such as a web server as well as other key elements (J2EE, Portal and Wireless).

Most of the middle-tier components are dependent on the Oracle Application Server infrastructure. For example, the middle-tier components, such as management and security services components, depend on the Oracle Application Server infrastructure for metadata. We will gladly share our knowledge with you further during the implementation.

We install Oracle Application Server on the following operating systems:

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade solution resulting in project success

- AIX
- LINUX
- Microsoft
- Solaris
- UNIX

We perform the service under the following clear conditions:

- Fixed scope and fixed implementation timescale

Requirements

The customer must provide a supported platform with an operating system that has been patched to the Oracle-specified requirements.

Major Deliverables

The following are included within the scope of the Oracle Application Server Install standard installation service:

- Pre-installation set-up
- Standard installation of Oracle Application Server 10g infrastructure
- Implementation of the “Standard Installation” infrastructure
- Implementation of the “Standard Installation” middle-tier instance
- Proof of functionality through demonstrations

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle’s methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
