

# ORACLE SOA ARCHITECTURE AND INFRASTRUCTURE SERVICE

## Oracle Expert Services

### AT A GLANCE

- Discover the best architecture for implementing SOA for your organization to maximize SOA benefits
- Learn how to take advantage of SOA from Oracle's SOA experts
- Receive recommendations and a plan for moving to a SOA flexible architecture
- Receive recommendations and a plan for implementing a SOA flexible, scalable, reliable architecture
- Comprehensive knowledge transfer of Oracle best practices on SOA direct to your team

*Do you worry whether your Service-Oriented Architecture (SOA) platform may not be giving you the best benefits the technology can bring to your business? SOA promises the twin benefits of business agility and flexibility at low cost. But how do you adopt this architecture in an efficient way, while at the same time supporting your business model and enjoying the benefits of SOA? The Oracle SOA Architecture and Infrastructure Service can assist you in the definition and design of SOA reference architecture and IT infrastructure to support your business. Our SOA Architectural Blueprint will allow you to realize the flexibility and agility of your SOA platform while still maintaining and valuing any of your previous IT investments.*

### Overview

Businesses today are being forced to respond faster to competitive and customer challenges. Increasingly, they are looking to IT to be a differentiator, providing flexibility and speed for addressing complex business needs. Forced to deliver more services in less time, IT managers are looking at technology foundations that provide this agility and reduced cost. Today, industry analysts and the IT press are pushing SOA as the latest “silver bullet.” These days, it is difficult to attend an IT conference or pick up a magazine without hearing about the promise of SOA agility and reuse through standard Web service interfaces in a loosely coupled architecture.

While a number of businesses have already successfully adopted SOA, many other IT professionals are still trying to understand how SOA can effectively help their business. Many are convinced of the need to move to a SOA architecture, but are unsure how to begin on adopting SOA in a practical way for their business. Some companies look to adopt practical approaches and initial architecture based on SOA pilot projects already selected. Other organizations ask for assistance in identifying projects or areas that are a good fit for their initial SOA implementations.

The Oracle SOA Architecture and Infrastructure Service offers the support of Oracle experts who can provide a consolidated methodology and approach, based on experiences gained on many successful SOA projects. Our experts can guide you in the definition and in the design of reference architecture and IT infrastructure - this can help you realize the flexibility and agility of your SOA platform.

### Scope of the Offering

The Oracle SOA Architecture and Infrastructure Services validates and reviews many

#### ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
