# Evoluzioni dell'architettura EDL

EDL-level digital metadata repository

Local-level digital data + metadata repository

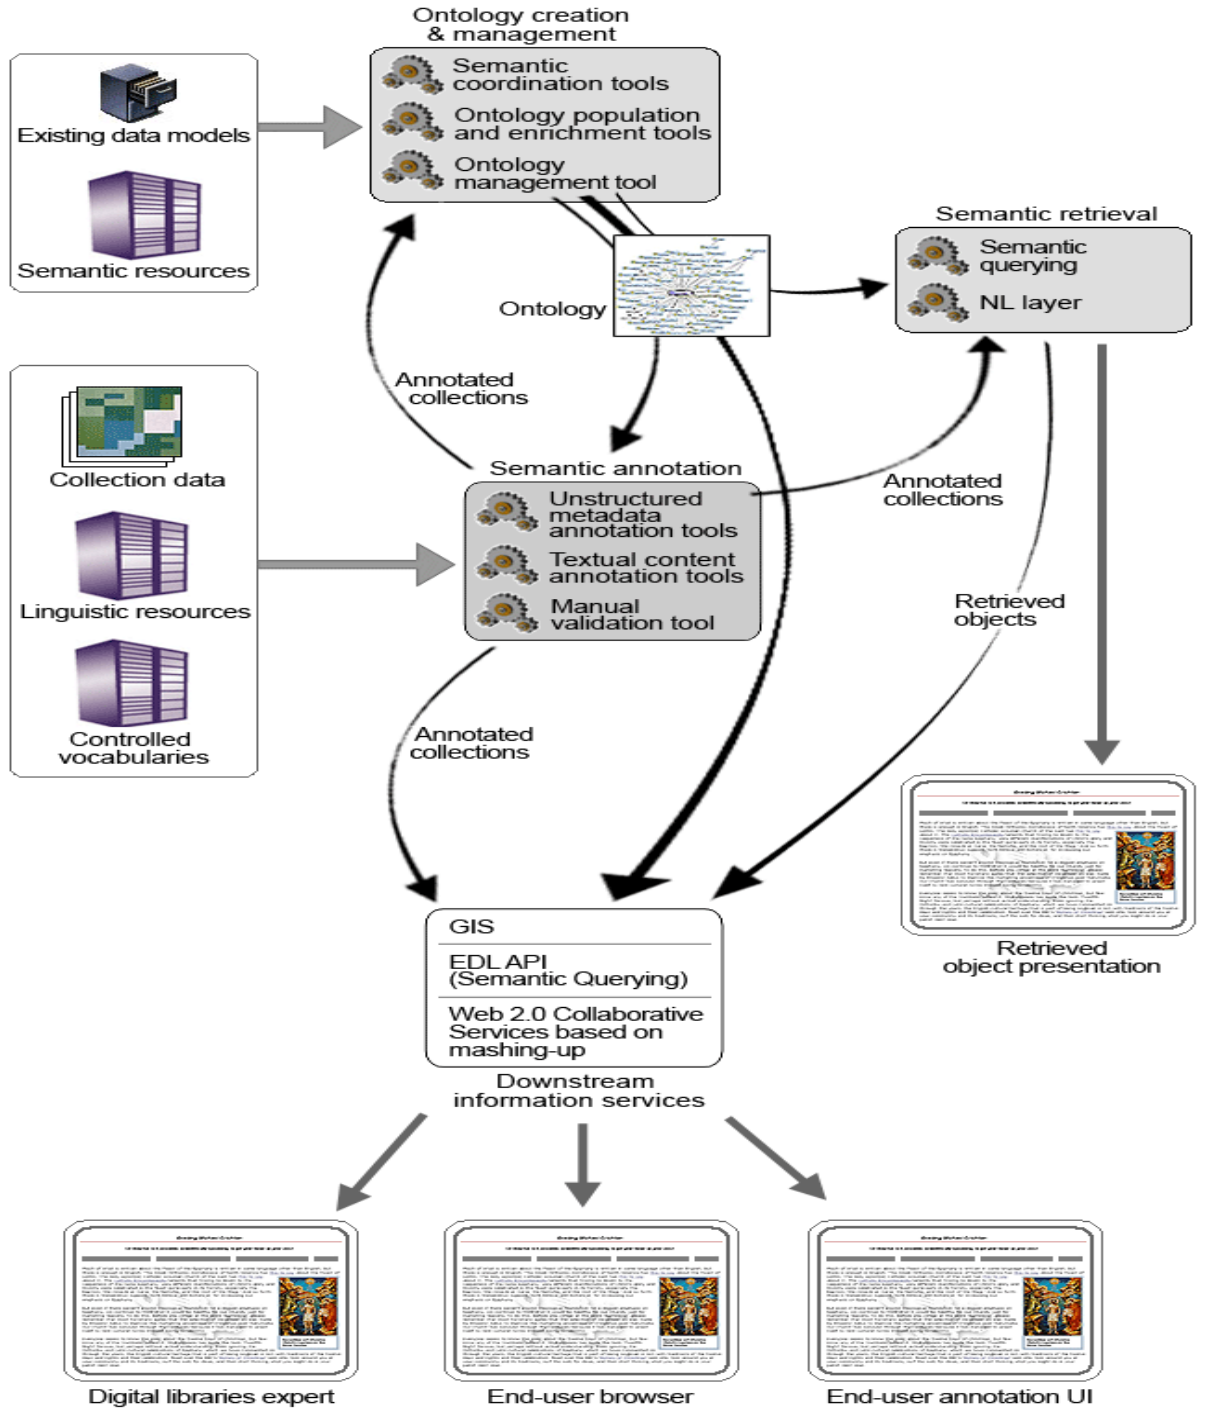

OAI-PMH

OAI-PMH

**Regional demonstrators**

# Items e oggetti

- L'unità bibliografica monolitica e la “unità di contenuto” (*contlet*)
- I modelli per gli oggetti condizione per la loro scambiabilità e riusabilità
- Il modello emergente: OAI-ORE
- ORE (*Object Reuse and Exchange: vd Open Archives Initiative – Object Reuse and Exchange. Report on the Technical Committee Meeting, January 11,12 2007, edited by: Carl Lagoze & Herbert Van de Sompel*)
- Vd. <http://www.openarchives.org>
- [ORE technical report](#)

# L'iniziativa LC3 in Italia

<http://lc3.spacespa.it/il-progetto>

L'ipotesi di lavoro:

- Le DL come repositories non solo di documenti, ma anche di conoscenze granulari
- La digitalizzazione come funzionale alla comunicazione culturale
- Il processo di comunicazione come funzione dinamica 1:molti alimentata da repositories semanticamente annotati

Un possibile contributo primario all'evoluzione della EDL in Europa e in Italia

# Building blocks

Area	Progetto
Metadati gestionali estesi alla gestione di oggetti (MAG-OBJ)	LC3
Repositories aperti per metadati e collezioni digitali compatibili OAI-PMH	BNU, LC3, OSCAR
Metadata enrichment semantico e spazio-temporale	LC3, OSCAR
Ontology annotation	LC3, OSCAR
Ontology population	LC3, OSCAR
Ontology coordination and semantic retrieval	OSCAR
Sistemi di outlining e publishing narrativo	LC3
Sistemi di mash-up geografico	OSCAR, LC3

Grazie!
