

Trampoline Systems receives Oracle PartnerNetwork Innovation Award

Further recognition for Trampoline's "Enterprise 2.0" technology

London, UK, 19 April 2007 – Trampoline Systems, a London-based enterprise software start-up, today announced that it has been honoured in the sixth Oracle PartnerNetwork Innovation Awards for EMEA. The awards encourage initiatives where Oracle's products and technology are applied in an innovative way to create value for customers and win new business. Trampoline was awarded second place for its SONAR platform, an Enterprise 2.0 technology which harnesses the social behaviour occurring in organisations to pinpoint expertise, leverage relationships and relay knowledge where it's needed.

Charles Armstrong, CEO of Trampoline Systems, commented on the award: "We are proud to have been recognised by Oracle on an EMEA-level. The European technology community is thriving and we are delighted to be seen as leaders in the field, especially by such an established vendor as Oracle. These awards provide a real platform for innovative enterprise software and it is pleasing that an Enterprise 2.0 company is among the honourees."

SONAR plugs into the corporate network and connects to existing systems including email servers, contact databases and document stores. It analyses this data to map social networks, information flows, expertise and individuals' interests throughout the enterprise. With SONAR, individuals get the information they need, unrecognised expertise becomes visible and the enterprise increases the reuse and value of its knowledge assets.

About Trampoline Systems

Trampoline Systems is an enterprise software developer based in London, UK. Trampoline's products harness social behaviour throughout organisations to pinpoint expertise, leverage relationships and relay knowledge where it's needed. Clients include Raytheon Company, the UK Foreign Office and Channel 4 Television. Trampoline was honoured in the sixth Oracle PartnerNetwork Innovation Awards for EMEA and received Oracle's UK Partner Innovation Award 2006. The UK Government recognised Trampoline's pioneering technology with a Research Award in 2004 and Trampoline is the first European "Enterprise 2.0" developer to receive institutional investment.
