

SIMPLY – On-Demand

SUMMARY

- **SIMPLY** delivers Best Practice configuration setups and business processes as a pre-packaged solution.
- **SIMPLY** reduces implementation time and implementation cost.
- **SIMPLY** significantly reduces the risk in project overruns and scope creep
- **On Demand** avoids recruitment and IT Training costs.
- **On Demand** avoids capital expenditure on hardware.

SIMPLY – Start Fast

Today's enterprise relies heavily on information technology to increase efficiency and drive performance. The growing interdependency between business applications and software infrastructure is introducing unprecedented complexity into the workplace. This complexity can stop an organisation from taking the bold step to new quality software and business critical applications.

The combination of **SIMPLY** and On-Demand delivers best practice application software that will deliver major business benefits and reduce your IT and applications cost to a predictable monthly fee.

Reduced implementation time and **reduced implementation costs** plus significantly **reduced risk** in project overruns and scope creep.

Oracle On-Demand helps your business:

- Keep your systems up to date, available and managed for performance by Oracle experts
- Improve security and protection against virus and unauthorised entry
- Improve system performance
- Increase the availability of software to the business
- Access product and technology experts dedicated to Oracle products
- Reduce your IT costs to a predictable monthly fee
- Reduce the complexity of system upgrades and patches
- Refocus IT resources on your core business

By taking advantage of the Oracle On-Demand program the additional benefits allowed to you include:

- Avoiding Capital expenditure on Hardware,
- Avoiding staff recruitment and Oracle IT Training
- Reducing your project risk.

SIMPLY - Software as a Service

SIMPLY plus Oracle On Demand delivers Oracle software as a service to Oracle customers around the world. Your Oracle software is managed by Oracle experts—at Oracle, at your location, or at a third party—to improve the performance, reliability, scalability and security of your information. Increase the efficiency of your business processes and systems with Oracle's industry-leading technology and let Oracle On Demand handle your upgrades, patches and maintenance. Now you can focus staff on strategic projects, deploying resources and technology for better user productivity and satisfaction.
